66. Winston-Salem, North Carolina
67. Youngstown, Ohio

STATUS OF CIVIL AIR REGULATIONS

21 October 1947

HOW TO OBTAIN PARTS, AMENDMENTS, AND MANUALS

The following tabulation carries all Civil Air Regulations, Regulations of the Administrator and Civil Aeronautics Manuals. Most of these regulations are available from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. (shown as GPO). Those carrying the remark CAA (Civil Aeronautics Administration) and CAB (Civil Aeronautics Board) may be obtained from the agency indicated. All part numbers not shown are obsolete or unassigned.

Regulations furnished by the CAA and CAB will include all effective amendments. Amendments for Regulations purchased from GPO must be requested separately from the CAA or CAB. When requesting Amendments, be sure to state Part or Manual numbers for which they are desired.

The Government Printing Office, the official sales agency for all government publications, requires that remittances be made in advance of shipment of publications, by check or money order payable to the Superintendent of Documents, Government Printing Office. Currency is sent at sender's risk. Postage stamps, foreign money, and smooth coins are not acceptable. For shipment to foreign countries an additional amount of about 1/5 of the purchase price is required for postage. Remittances should be by International Money Order payable to the Superintendent of Documents or draft on an American bank. A discount of 25 percent is allowable to book dealers and quantity purchasers of 100 or more publications, on condition that the purchasers will adhere to the public sales price set by the Superintendent of Documents and that publications shall not be over-printed with any advertising matter.

AS THEY ARE RELEASED, ALL AMENDMENTS, AND NOTICE OF THE ISSUANCE OF NEW PARTS AND MANUALS, ARE PRINTED IN THE MONTHLY CAA JOURNAL. AVAILABLE FROM THE GPO AT 75 CENTS PER YEAR.

2/ Amendment Published in Federal Register Vol. 12 No. 37 15¢

3/ Given on Radio Facility Charts, published by U. S. Coast & Geodetic Survey. Single charts 15¢

4/ Published in Federal Register, Vol. 11, No. 177, Amendment in Vol. 12, No. 37 Total cost [illegible]

5/ Published in Federal Register, Vol. 11, No. 177, Amendments in Vol. 11, Nos. 251, 255 and Vol. 12, Nos. 2, 4, 69, 94, and 141. Total cost $1.40

6/ Published in Federal Register, Vol. 12, No. 61

7/ Supplements Part 525

CAA RATINGS AND PARTS AND MANUALS RELATED THERETO

For your guidance there are listed below the parts and manuals applicable to the various airmen certificates issued.

Pilots:
Parts 20, 43, 60, Regs. 501, 503, and Manual 60.

Airline Transport Pilots:
Parts 01, 04, 21, 27, 40, 60, 61, 93, Regs. 501, 503, and Manuals 04, and 60.

Lighter-Than-Air Pilots:
Parts 22, 60, Regs. 501, 503, and Manual 60.

Aircraft Mechanics:
Parts 01, 04, 15, 18, 24, Regs. 501, 503, Sec. 43.132, and Manuals 04, 15, and 18.

Aircraft Engine Mechanics:
Parts 01, 04, 13, 14, 18, 24, Regs. 501, 503, and Manuals 04, 14, and 18.

Parachute Technicians:
Parts 15, 25, 56, 60, and Release 144.

Air-Traffic Control-Tower Operators:
Parts 26, 60, and Manual 60.

Aircraft Dispatchers:
Parts 27, 40, 60, 61, and Manual 60.

Ground Instructors (rating in Civil Air Regulations): Parts 01, 20, 51, 60, Regs. 501, 503, and Manual 60.

Flight Engineers:
Parts 13, 35, 40, 41, 42, 43, 60, 61; Manual 14.

Flight Radio Operators:
Parts 043, 16, 21, 33, 40, 41, 42, 44, 60, 61, and Manuals 16 and 60.

Flight Navigators:
Parts 34, 41, 44, 60, 61, and Manual 60.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Butte	Pocatello	Williston	WAC 305
Elko	Rapid City	Yellowstone Park	26DF
Glacier Park	Roswell	WAC 217	FC 216
Miles City	Salt Lake City	WAC 269	

CORRECTION: The next print of WAC 304 will be a new edition, not a new print, as stated in the October 27 issue of the Dates of Latest Prints. This will make former editions of WAC 304 obsolete.

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

NEW EDITIONS

CANCELLED CHARTS

AL 169, 173, 181, 440, 441, 529, 539.

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with the prefix (AL); Flight charts 25 cents each, by number with the prefix (FC); Direction Finding Charts, 40 cents each, by number and with the suffix as in 22 DF; Local Charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with the prefix (OP). Consult the monthly Dates of Latest Prints of Instrument Approach and Landing Charts for further information concerning I A & L charts and Obstruction Plans.

SPECIAL NOTICE

Instead of the comprehensive separate semi-annual Directory of Airports originally called for, an abridged bi-weekly directory will be issued temporarily, and incorporated in the Airman's Guide. The first directory is in this issue.

This bi-weekly issuance has been necessitated by the great number of changes stemming from the National Airport Plan, by the non-stabilization of the entire airport field, and by public demand. Too, from a budgetary standpoint, the printing costs of a semi-annual comprehensive directory and a bi-weekly abridged directory are almost identical.

Three innovations have been incorporated in the Guide directory. The airport type (municipal, commercial, Air Force, Navy, private, etc.) is now included, as well as the class (S-1, 1, 2, 3, 4, 5, etc.), and the number of runways or strips.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force

(N) " (with N in Type column) - Owned or leased totally by Navy

(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard

(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.

(N) " - Open to civilians but owned or leased wholly or in part by Navy

(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.

(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.

(P) " - Civil airport open to military aircraft. (See Note 2).

* " - C.A.A. Intermediate Field.

*Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

TYPE

A	-	U.S. Air Force	N	-	Navy
CG	-	Coast Guard	NG	-	National Guard
I	-	Intermediate	P	-	Private
M	-	Municipal			

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

Class S-1	Strip Length Less than 1800'	Runway (Paved) Length Less than 1800'
1	1800-2699'	1800-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

RUNWAYS

Actually only hard-surfaced or paved landing areas are runways. Unstabilized (sod, clay, gravel, etc.) landing areas are strips.

In "longest" column is stated length of longest landing area in hundreds of feet.

"h" indicates landing area is hard-surfaced or paved.

"sw" indicates allway field.

FACILITIES AND SERVICING

RADIO

R1: Control tower voice
R2: Range (or H facility) with voice
R3: Range (or H facility) and tower
R4: Range (or H facility), tower, and ILS

LIGHTS

L : Incomplete lighting, such as flood and/or portable or fixed
L1: Beacon only strip or runway lights.
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel (Any S combination in parenthesis indicates only part time or irregular attendant)
S2: Fuel, storage
S3: Fuel; storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS

(a) "91 oct." indicates fuel octanes available. "USAF", or "Navy", following octane indicates USAF or Navy contract fuel available.

(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency.

(c) "Port. B-2 lights" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway, or strips.

(d) "TEMP INACT. NO FACS." indicates USAF airfields used either exclusively by the USAF or municipal airfields used jointly by the USAF and civil interests at which both the USAF and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned.

(e) "USAF TEMP INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and civil interests at which the USAF facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.

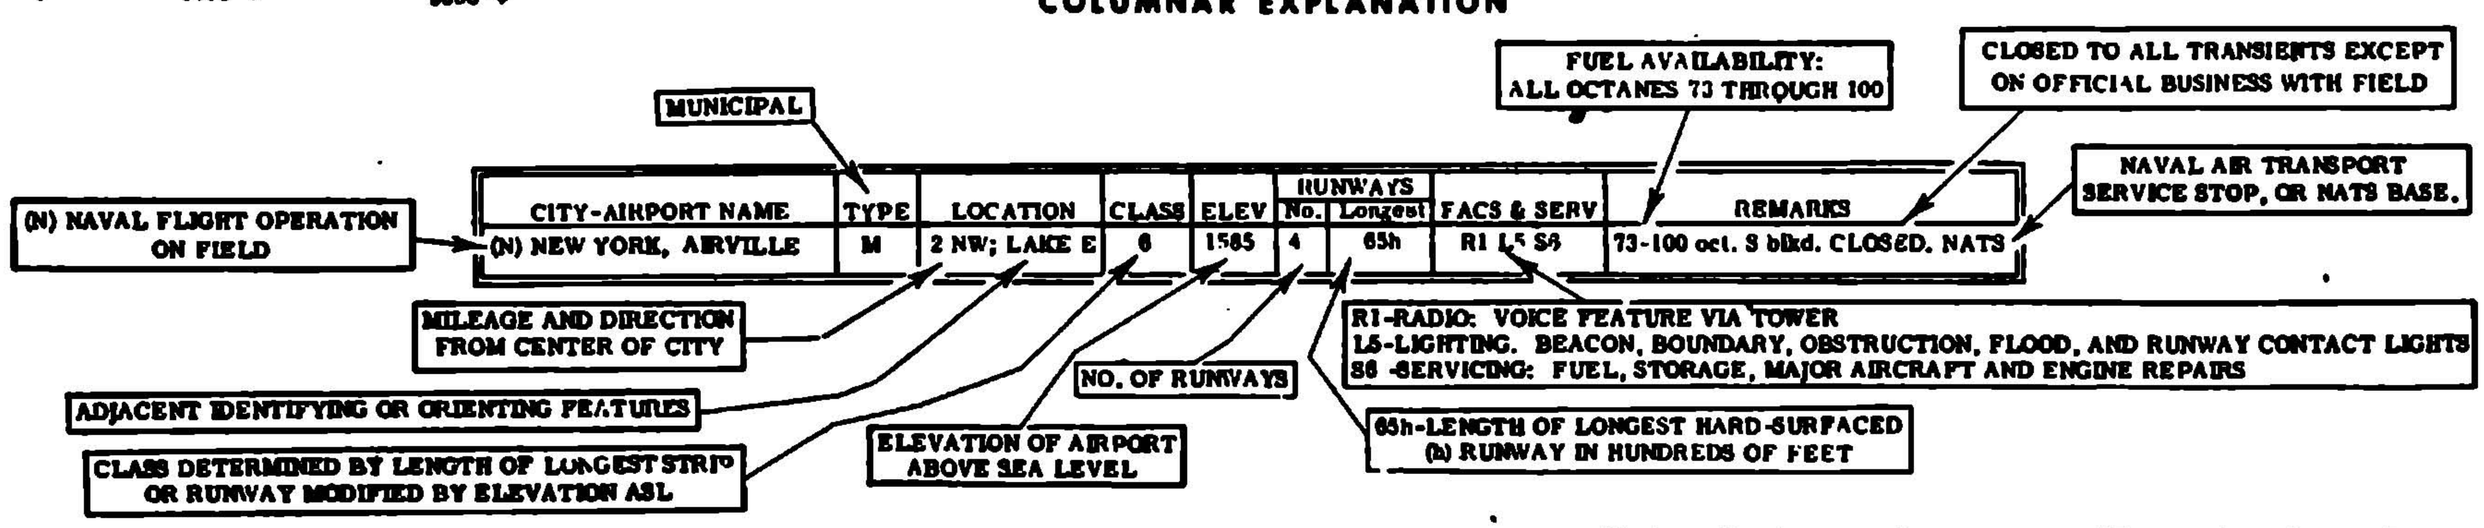
(g) "Fld lights on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the field lights, indicated for such a lighted field (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.

NOTES

1. ← Notam data revising previous issues.**
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, LS-D" in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Many personal use fields are not covered in the Airman's Guide because they are impermanent in nature and have little value as emergency landing areas.
6. "(Formerly Army)" or "(Formerly Navy)": These former Army and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

**At the bottom of the last column, under the heading of new airports will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

COLUMNAR EXPLANATION



AIRPORT NAME ABBREVIATIONS

AFB	- U.S. Air Force Base	LTA	- Lighter than Air	NAAS	- Naval Aux. Air Station	NPG	- Naval Proving Grounds
AFF	- U.S. Air Force Field	MCAS	- Marine Corps Air Station	NAF	- Naval Air Facility	OLF	- Outlying Field (Navy)
CGAS	- Coast Guard Air Station	MCAAF	- Marine Corps Aux. Air Facility	NAS	- Naval Air Station		

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, ATTN: Flight Operations Division, A-3. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 61-4, USAF aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA AND AZORES - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. ALASKA - McChord Field, Wash., or Great Falls AFF, Mont. BERMUDA - Mitchel Field, N.Y., Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., Westover Field, Mass., or Fairfield-Suisun AFF, Calif. CANADA - Great Falls AFF, Mont., Brookley Field, Ala., McChord Field, Wash., Washington National Airport, D.C., Selfridge Field, Mich., or Westover Field, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO AND SOUTH AMERICA - March Field, Calif., MacDill Field, Fla., Kelly Field, Tex., or Brookley Field, Ala. CARIBBEAN - Brookley Field, Ala., Kelly Field, Tex., or MacDill Field, Fla. ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND - Washington National Airport, D.C., or Westover Field, Mass. NOVA SCOTIA AND NEWFOUNDLAND - Washington National Airport, D.C., Westover Field, Mass., Selfridge Field, Mich., or Brookley Field, Ala. HAWAII - Fairfield-Suisun AFF, Calif. EUROPEAN THEATER - Brookley Field, Ala, MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass.

CLEARANCE OF USAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with notification from Chief of Staff, U.S. Air Force, July 2nd AF Letter 63-9 has been rescinded and the following instructions will govern the clearance of USAF aircraft in the New York City Area. For clearance purposes into or from the New York City Area (encompassed by a 25 mile radius from the southern tip of Manhattan), VFR is defined as ceiling at least 2000' and visibility 3 miles or more; IFR when the visibility is not less than one mile and the ceiling is unlimited, or when the ceiling is not less than 5000' and the visibility not less than 2 miles. USAF aircraft flying into the New York City Area may be cleared to any authorized field therein provided weather conditions are not less than those defined above. In all cases in-flight approval from Olmsted Flight Service Center by contacting Olmsted Airways, Rome Airways, Westover Airways, Mitchel Airways, or Ft. Dix Airways must be obtained prior to proceeding to the field of destination. All pilots whose destination is an airfield within the area will indicate on the AF Form 23 that their flight plan to the field of destination is via any of the 5 stations listed. Flights for which the point of first intended landing is Mitchel Field may be made using normal clearance procedure and restrictions outlined herein are not applicable to that station. Appropriate clearance may be made from a field at which weather conditions meet above specifications even though weather in other sections is below specified minimums. USAF aircraft engaged in regularly scheduled transport flights under the operations control of the Air Transport Command are exempt from these restrictions.

✓ Indicates new or revised Special Notices

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	AFF FREQUENCY	CHANNEL	AFF FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical with those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

✓ IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in TO 08-15-3 or Pilots Handbook, USAF policy states that the "Regular - Day" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

✓ CORRECTIONS FOR AND ADDITIONS TO ARMY T.O. 08-15-1:

(1) Correct page 8, by deleting reference to AACS at Moncton, Canada, as station is operated by Canadian Government.

(2) Correct Navy GCA Data, by showing Olathe NAS, Kans. as having emergency communications frequency of 293 kc rather than 201 kc.

(3) Correct Los Alamitos NAS, Calif., control tower transmitting on 379 kcs. instead of 317 kc.

(4) Correct West Palm Beach (formerly Morrison Field), Fla. radio range class by showing range class as BMRAZ and with weather broadcast at 15 and 45 minutes past the hour.

✓ CORRECTION TO USAF T.O. 08-15-2:

Correct page 32, AN/CPN-6 (YM) Beacons (X-Band), Domestic, by showing the correct geographical coordinates for New Orleans NAS, La. facility as 30-01-34 N, latitude; 90-04-02 W (approx), longitude, and operating hours as continuous.

✓ CORRECTIONS TO USAF T.O. 08-15-3: (1) Correct page 70, Louisville procedure, by reversing arrows indicating the headings of 86° and 266° on the E and W courses of the radio range.

(2) Correct March Field, Calif. procedure, by showing the procedure turn to the N side of the W leg of the radio range.

✓ CORRECTION TO USAF PILOTS HANDBOOK: Correct March Field, Calif. instrument approach procedure, Southeast U.S., by showing the minimum altitude over field as 3500'.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No.9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the C.A.A. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

V.H.F. CHANNEL ASSIGNMENTS: Following are Navy assignments:

CHANNEL	NAVY FREQUENCY	CHANNEL	NAVY FREQUENCY
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	128.70	9	142.74
5	143.28	GUARD	140.58

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions, or existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction; or merely a burned-out obstruction light or a runway partially unusable because of construction. Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood, or snow, a runway closed because of construction, or the erection of a pole line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public and the data may be checked from an engineering standpoint for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

DIRECTORY OF AIRPORT NOTAMS: Because of space limitations, the airport directory perforce serves as a notam supplement. Notam data revising previous directory issues are indicated by prefixed arrows. The only airport data (other than temporary conditions) carried in the Notices to Airmen section are coordinates (latitude and longitude), lighting changes, name changes, and abandonments.

CIVIL USAGE OF MILITARY FIELDS: USAF and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

REISSUANCE OF EXPIRED PILOTS CERTIFICATES: 20.550 Reissuance. Any person who on June 30, 1947, held a valid private or commercial certificate and who failed to exchange such certificate in accordance with Section 20.55 of the Civil Air Regulations, may, notwithstanding such failure and without other showing, obtain a pilot certificate with appropriate ratings upon application to the Administrator.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the United States unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting aircraft and shall be presented for examination to any inspector of the Administration or state or local law enforcement officer upon the request of such inspector or enforcement officer.

DUPLICATE AIRMAN CERTIFICATE AND RATING RECORD FEE: The fee for duplication of an airman certificate and rating record which has been lost, mutilated or destroyed is now one dollar. All airmen should be guided accordingly when making remittance for duplicates. The notation on the reverse side of the airman certificate and rating record form stipulating a fee other than one dollar for both certificate and rating record is to be disregarded. In future reprints of the form, the notation will be revised to indicate one dollar for duplication.

Duplicate medical certificates are issued only at the discretion of the examining physician. Requests for such duplicate certificates should, therefore, be made directly to the physician who performed the examination.

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission field offices, or before any CAA flight examiner of the CAA, who has been designated by the FCC to issue the permits, proves he is a U.S. citizen, that he has need of such an authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorization then and there. FCC offices are listed under United States Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices. There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports. The "examination", if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months, the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded.

To reduce the number of such complaints, it is requested that the following practices be put into effect by all fliers:

1. Discontinue all unnecessary low flying.
2. When weather and traffic volume permit., increase altitudes of all traffic patterns that require flight over inhabited areas.
3. Re-route channels of approach and departure to avoid residential and business districts whenever possible.
4. If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum.
5. Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

SEAPLANE OPERATIONS: Because of the possibility of local ordinances or restrictions prohibiting seaplane operations in resort or congested areas, the Administrator has issued the following advice to seaplane operators:

"1. Take off as far out from the shore as possible.
2. Cut the take off run as short as safety permits.
3. Fly high enough to avoid criticism from residents below, or arrange the flight plan so that you pass over as few houses as possible.
4. Avoid unnecessary 'gunning' or racing of the engine.
5. Explain carefully to those who complain what you are doing to make your airplane a good neighbor.

In the CAA-Federal-aid Airport program, we are promoting the use of seaplanes by assisting communities in establishing inexpensive docking and servicing facilities. In view

of the high utility value of the seaplane or amphibian, we believe this to be a definite step in the advancement of personal flying in general. Hence if we are to find acceptance of such facilities, it is up to those pilots who now operate seaplanes to assist us to the utmost by safe and considerate operation of their aircraft".

N.B. The Administrator's admonition was occasioned by numerous complaints received from lake-side residents and vacationists.

SEAPLANE BASE DIRECTORY: A new Seaplane Base Directory will go to press December 1, 1947. The current directory dated June 15, 1947, is available to any qualified operator or owner upon request to: Office of Aviation Information, Attention: A-258, C.A.A., Department of Commerce, Washington 25, D. C.

CONTROL TOWER TUNING PRECAUTION: On some aircraft receivers, the channel of 278 kc is identified as "tower", on the tuning control nameplates. This is not always correct as many towers transmit on frequencies other than 278 kc. Reports indicate that some confusion is being created by the failure of pilots to tune their receiver to the tower transmitting frequency when such frequency is other than 278 kc. It is suggested that pilots use care and make certain that they are tuned to the transmitting frequency of the tower with which they desire to communicate.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

PRIVATE FLIER VHF FREQUENCIES: All CAA Communications Stations and Towers are discontinuing receiving watches on 131.7 and 131.9 mc as new equipment becomes available to guard the new private flier frequencies of 122.1 mc for transmission to CAA Communications Stations and 122.5 mc for transmission to CAA operated towers. Practically all CAA towers now guard 122.5 mc but the communications stations program is not fully effective yet because of non-receipt of the new receivers.

CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mc if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mc, in addition to towers' low frequencies.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

TWO-WAY RADIO FAILURE PROCEDURES: In the event of failure of two-way radio communication between an aircraft and the ground, the pilot will observe one of the following procedures: (a) If operating under VFR conditions, proceed under VFR and land as soon as practicable, or

(b) Proceed according to the latest air traffic clearance.

If the pilot proceeds according to the latest traffic clearance but has not received and acknowledged a clearance to the tower and if other instructions to the contrary are not received and acknowledged a clearance to the tower and if other instructions to the contrary are not received, he shall be expected to observe the following and control will be effected accordingly: (1) If the pilot has received and acknowledged a clearance to the destination airport or the radio facility serving that point, he shall continue flight at the altitude(s) last assigned by Air Traffic Control, or the minimum instrument altitude, whichever is the higher, to the radio facility serving the destination airport.

(2) If the pilot has received and acknowledged a clearance to a point other than the destination airport or the radio facility serving the destination airport, he shall continue flight at the altitude(s) last assigned by Air Traffic Control or the minimum instrument altitude, whichever is the higher, to the radio facility serving the destination airport.

(3) If holding instructions have been received, the pilot shall comply with these instructions until such time as it will be necessary to continue flight so as to arrive at the radio facility serving the destination airport at the expected approach time last received and acknowledged, maintaining the last assigned altitude or the minimum instrument altitude, whichever is the higher.

(4) If holding instructions have been received, but no expected approach time has been received, the pilot shall comply with these instructions until the time Air Traffic Control has specified that further clearance may be expected. He shall then continue, maintaining the last assigned altitude or the minimum instrument altitude, whichever is the higher.

NOTE: The minimum instrument altitude referred to is the minimum established for that portion of the route over which the operation is conducted, regardless of the direction of flight.

Approach: Descent from the altitude maintained to the radio facility serving the destination airport shall be made on the final approach course and shall start at the expected approach time last received. If no expected approach time was received, descent shall be started at the last estimated arrival time specified by the pilot, or as soon as possible thereafter. A full standard instrument approach should be executed unless a VFR approach can be made.

If a clearance to the tower at the airport of intended landing has been received and acknowledged, the pilot shall be expected to comply with any special instructions contained in the clearance and make normal descent for landing.

NOTE: Air Traffic Control may issue appropriate instructions to be broadcast 'blind' over air carrier radio facilities (for air carrier aircraft), and over suitable radio range facilities. Instructions must not be broadcast unless Air Traffic Control authorizes such broadcast.

VFR (Formerly CFR) FLIGHT PLANS, AND ARRIVAL REPORTS: VFR flight plans may be filed with any CAA airways communication station or air route traffic control center. VFR flight plans are not transmitted. One hour after E.T.A., if no notice of arrival is received at the station at which the flight plan was filed, queries are sent out over CAA communication systems. If the arrival report is not received within three hours, search and rescue operations are initiated. Inasmuch as the Government may be put to considerable expense in determining the location of aircraft when an arrival report is not filed, it is vitally necessary that all pilots using this service make certain that notice of arrival is filed with the CAA communications station at the termination of the flight.

To reduce radio congestion, pilots should file VFR flight plans, when required, in person or by telephining the airways communication station or air route traffic control center. CAA control towers have discontinued accepting VFR flight plans for transmission and will not normally transmit arrival reports except upon the specific request of the pilot. Whenever practicable, however, it is desired that arrival reports be filed in the same manner as flight plans. (This corrects Chapter IX, Page 114, of the July 1, 1947, Flight Information Manual).

CLEARANCE PROCEDURES FOR IFR FLIGHT: Effective October 8, 1947, and concurrent with effective date of C.A.R. 60 as revised, new clearance procedures for IFR flights are being used in the control of Air Traffic.

1. No Air Traffic Control clearance will be issued for flights operated in accordance with visual flight rules except for flights within a control zone as prescribed in C.A.R. 60.2.

2. Flight plans specifying flight in accordance with VFR for a portion of a flight will be accepted at the point of departure. If VFR flight is proposed for the first portion of the flight, the pilot will be advised to request IFR clearance from the appropriate communications station along the route of flight. The pilot must remain in VFR weather conditions until the clearance is received.

3. When a flight plan indicates IFR flight for the first portion of flight and VFR for the latter portion, the aircraft will be cleared to the point at which VFR flight is planned, inasmuch as no clearance is necessary for VFR flight. The pilot is expected to continue his flight without further contact with Air Traffic Control.

4. Standard separation from other IFR traffic will be provided aircraft on IFR flight plans, except (a) when "at least 500' on top" has been assigned or authorized by ATC in lieu of a cruising altitude if frequent pilot reports indicate a generally unlimited ceiling on top and a forward visibility of at least 3 miles. (b) when VFR operation is specified by ATC during climb to cruising altitude, descent from cruising altitude, or change of altitude enroute. If the flight cannot be conducted under VFR conditions when such clearance is received, it is the pilot's responsibility to secure an amended clearance before proceeding IFR.

5. Pilots may cancel IFR flight plans at any time by so notifying ATC provided they are operating in VFR weather conditions when they take such action. Where conditions indicate that the remainder of a flight can be conducted in accordance with VFR, a pilot should avail himself of this procedure to lift the restrictions on his own flight and to simplify the general traffic situation. Caution should be exercised, however, that flight plans not be cancelled when IFR conditions are expected in some subsequent portion of a flight. When a flight plan is cancelled and a new instrument clearance is later requested, priority of handling will be based upon the time of filing the new flight plan.

6. When a flight plan is filed indicating altitude change beyond the control area of the center controlling the point of departure, the flight will be cleared to destination with instructions to maintain the altitude at which the aircraft enters the next control area. The pilot should request further altitude changes enroute. Better service can be given the pilot if an altitude change is requested at the time the change is desired.

This procedure cancels and supersedes the Altitude/CFR procedure now contained in the Flight Information Manual.

AIRPORT LIGHT SIGNALS: Effective October 8, 1947, the following special light signals are prescribed by the Administrator for use at airports in accordance with C.A.R. 60.108 (e): (1) A white rotating airport beacon lighted during daylight hours, or flashing lights on a tetrahedron during the hours of darkness, shall mean the official ground visibility at the airport is less than 3 miles, and that if the airport is within an airport control zone, a traffic clearance is required for landing, take-off or flight in the traffic pattern.

(2) A flashing amber light at an airport shall mean clockwise flow of traffic is in effect and that right turns shall be made unless otherwise authorized by Air Traffic Control. These special light signals are in addition to those prescribed in the CAA Flight Information Manual for use with a directed portable traffic signal light, and will be included in the next edition.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS:

(1) Correct Coast and Geodetic Survey's Radio Facility Chart No. 1, dated October 2, 1947, by showing Port Angeles as a Coast Guard Air Station rather than Navy.

(2) Correct Coast and Geodetic Survey's Radio Facility Chart No. 12, dated August 29, 1947, by correcting the Dansville, N.Y. Communications Station listing to an MHVT fac. and the guarded frequency to 3117.5 kcs. instead of 3127.5 kcs.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long.	Elevation	Action Taken
Mt. Vernon, Wash.	SW	48-28, 122-26	146'	Established
Castine, Maine	6-Hourly	44-23, 68-48		Established
Valpariso, Florida	Pibal	30-29, 86-31	54'	Re-established
Clarendon, Texas	Hourly	34-56, 100-56	2874'	Re-established
Alice, Texas	Hourly	27-44, 98-01	180'	Re-established
Richmond, Indiana	SW			Established
Louisville, Ky.(Standiford Field)	Hourly	38-11, 85-44	480'	Established
Norfolk, Nebr.	SW	42-02, 97-25	1551'	To be avail. soon
Palestine, Texas	SW	31-47, 95-45	410'	Established
Independence, Kans.	Hourly			Closed
Pt. San Luis Obispo	3-Hourly			Discontinued.

NOTE: SW reports discontinued from White Plains, N.Y. and hourly reports inaugurated in lieu thereof. Effective Dec. 1, 1947, 6-hourly and pibal reports will be available from Standiford Field rather than Bowman Field, Louisville, Ky. Terminal forecasts to be inaugurated soon for Standiford Field in lieu of Bowman Field. Terminal forecasts inaugurated for Lafayette, Indiana.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with 2-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off.

(b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See A.F.F. Regulation 100-4, dated March 4, 1944, and C.A.R. Digest or Manual 60).

(c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons, indicate that the ground visibility is less than 3 miles and a traffic clearance is necessary to enter the traffic pattern of airports within the control zone.

FOREIGN SPECIAL NOTICES

INTERNATIONAL NOTAMS: The only source of international notams will be the C.A.A. Overseas-Foreign Aeronautical Communications Stations at the following locations:

New York, N.Y.; Miami, Fla.; New Orleans, La.; Balboa, Canal Zone; San Francisco, Calif.; Seattle, Wash.; Honolulu, Hawaii; Anchorage, Alaska.

FOREIGN ENTRY PROCEDURES, AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Vol. 2, No. 1, dated July 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

[redacted]: ALBERTVILLE ARPT: Use NW/SE strip only. S side NW/SE strip rough in spots. (10-14)
ANDALUSIA ARPT: Bare in spots. Ctn in wet weather. (10-14)
ANNISTON ARPT: Ends of strips soft in wet weather. (10-14)
ATHENS ARPT: E/W strip soft in wet weather. (10-14)
BARIN NAAS EAST AND WEST FLDS (FOLEY): Closed to trans acft. (5-6)
BIRMINGHAM-RADIO: VHF-omni-directional rng without voice operates on test basis, fac unmonitored, and subject to interruptions; not to be used for navigational purposes. Freq. 116.3 mcs, ident. "BH".
BIRMINGHAM ARPT: Closed to civil acft not equipped with operating rcvr. Landing on sod areas approved by twr in dry weather, unsafe in wet weather. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. (11-6)
BIRMINGHAM-ROBERTS FLD: S side fld avail. in wet weather. N side rough. (10-14)
BRIDGEPORT-ALA.-TENN-GA ARPT: Ctn in wet weather. (10-14)
BROOKLEY FLD (MOBILE): Soft-use rnwys, taxi strips only. (10-26)
CENTRE-CENTRE ARPT: NNW/SSE strip closed. N side E/W strip rough. (10-14)
COLUMBIANA MUN. ARPT: Use N/S strip only. (10-14)
CRAIG FLD (SELMA): Bndry lgts inop. Fuel avail. on off. bus. only. (10-27)
DEMOPOLE-BOYKIN FLD: Cattle on fld. (10-14)
DOTHAN-NAPIER FLD: Use rnwys only. (10-14)
EUFAULA-WEEDON FLD: Trees in W approach. (10-14)
EUTAW ARPT: Use only NW/SE strip. (10-14)
FOLEY-OAK ARPT: W end E/W, N end N/S strips soft in wet weather. (10-14)
GADSDEN-GOODYEAR FLD: Soft in wet weather. Lgt acft land with ctn. (10-14)
GUNTER FLD (MONTGOMERY): Closed to all trans acft. Use Maxwell Fld. (6-24)
HARTSELLE-HARTSELLE ARPT: Inactive. No base operator. Emerg. use only. (10-14)
HUNTSVILLE ARPT: Sod strip rough at rnwy crossings. Ngt approaches use ctn-hills NE, S, E. (10-14)
JASPER-WALKER CO. ARPT: Land inside of bndry mrkrs. Avoid new landing strip now being graded. (10-14)
LANETT-VALLEY AIR SERVICE: Soft after rains. (10-14)
LIVINGSTON-JACKSON FLD: Rolling and slightly rough. Soft spots along N side at SW end. (10-14)
★MAXWELL FLD (MONTGOMERY)-RADIO: USAF GCA fac operates: Cont during IFR; 0800-1600 Mon thru Fri., and on 40 minutes call at other times. (11-19) FLD: At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)
MOBILE-BATES FLD: N/S rnwy lgts inop. (8-26)
MONROEVILLE-LEGION FLD: Do not confuse golf course fairways with landing strips. (10-14)
MONTGOMERY-ALLENPORT ARPT: Muddy after rains-ctn. (10-14)
MONTGOMERY-NORMAN BRIDGE ARPT: Muddy after rainy weather. (10-14)
ONEONTA-MOODY FLD: N end strip soft, wet and rough. (10-14)

[redacted]: PRICHARD-CHASTAIN'S ARPT: Soft after rains. Shallow dip near center of E/W strip. (10-14)
TALLADEGA ARPT: N 700' N/S strip soft in wet weather. (10-14)
TUSCALOOSA-VAN DE GRAAFF ARPT, SITE 59, FV-AG: Heavy acft avoid extreme NW and SW corners of fld after heavy rains. (6-3)
TUSKEGEE-MOTON FLD: Use with ctn in wet weather. (10-14)
WINFIELD ARPT: S end N/S strip soft in wet weather. (10-14)
[redacted]: DAVIS MONTHAN FLD (TUCSON): E fld closed-acft parked on rnwys. Blinding cellometer W end fld between ends of NW/SE, E/W rnwys. SAC acft under off. orders will be given full svcg; acft of other commands will be given sufficient fuel for flgt to next fuel stop plus rqrd reserve. Obst lgt inop on 75' pole SE control twr. Former taxi strips 12R and 30L are now open as Rnwys 12R and 30L to be used by lgt acft and rstd to day opers only. (9-24)
GILA BEND AFF (GILA BEND): Maj obsts S fld lgtd. (7-21)
GILBERT AUX FLD #1: Closed to all acft-used for tow target dropping. Hazardous objects on fld. (7-31)
GOODYEAR AUX FLD #2: Closed to all acft-used for tow target dropping. Hazardous object on fld. (10-9)
KINGMAN AFF: Closed to all flying. No obst lgts atop Haulpai Mtn. 8500' MSL, 11 mi. S. (7-3)
LITCHFIELD PARK NAF: No landings permitted later than one half hr before sunset without prior approval from CO. No ngt opers. (10-3)
LUKE FLD (PHOENIX): Traffic direction indicator on 2nd hangar from N not operating. (10-15)
MESA-OASIS ARPT: W end E/W, SW end NE/SW strips unsafe for a distance of 500' (ditches across ends) (7-24)
PHOENIX-RADIO: Visual courses of VHF rng not monitored. (8-18). Freq. 108.3 mcs, ident. "PH".
PHOENIX: Inst training on Phoenix Rng between 5500 and 9500'.
PHOENIX-SKY HARBOR ARPT: Local ngt flying acft must be equipped with 2-way rdo. Equip. near Rnwy 12. Installation of ILS in progress off end of Rnwys 26 and 8. (10-3)
SALOME INT, SITE 27B, LA-PH: E/W strip hazardous, but usable with ctn. Sides washed by hvy rains. Damaged portions mrkd. N/S strip avail. (8-11)
★SKY HARBOR ARPT (PHOENIX)-RADIO: CAA twr now transmits on 278 kcs, 118.5 mcs. Grds 3105,4495,6210,3117.5 kcs, 116.1,140.1,118.5,122.5 mcs. (11-17)
TEMPLE BAR ARPT: Unsafe (soft). (6-25)
TUCSON-DOWNTOWN ARPT: Oper of lgts depends on student training, no fixed schedule. (10-3)
TUCSON-GILPIN ARPT: Circle fld for lgts. (10-24)
WILLIAMS FLD (CHANDLER): Use rnwys only. Exten rnwy repairs being conducted. All acft use ctn from 1200M Fri until 0800M Mon each week. No fuel avail. trans acft. (8-20)
★WILLIAMS FLD (CHANDLER)-RADIO: USAF VHF DF stn in operation during student flying only. Freqs are 139.32, 140.58 mcs. (11-13) USAF rng unreliable and to be used for training only. (9-12)
WINSLOW-RADIO: Visual-aural rng stn operates unattended or without means of remote monitor. Freq. 108.7 mcs, ident. "WO"
WINSLOW ARPT: Acft with rdo ctc Winslow Rdo for lgts. Non-rdo equipped acft circle arpt and flash navigation lgts when rnwy lgts rqrd. Neon approach lgts inop. (9-29)
YUMA CO. ARPT: Bndry lgts inop. (10-3)
[redacted]: ALMYRA ARPT: Ctn on taxiways.
BATESVILLE ARPT: N/S strip and E end E/W under const-unusable. Taxiway to fuel pump hazardous. (10-17)
BIGGERS ARPT: Use strips only-cattle on fld. (10-23)
EL DORADO ARPT-GOODWIN FLD: Use rnwys only. (10-23)
FORT SMITH ARPT: W end NW/SE rnwy from intersection W closed. Use rnwys only. (10-23)
HELENA-THOMPSON-ROBBINS FLD: Use rnwys only-soft, rough. (10-23)
HOPE ARPT: Use rnwys only. (10-23)
HOT SPRINGS MEMORIAL ARPT: Ctn in traffic. Inten. student training. No twr control. Use rnwys only. (10-23)
JONESBORO ARPT: Use rnwys, taxi strips only. (10-23)
LUXORA INT, SITE 39, NO-LS: 30' unlgtd p-line being erected S end N/S rnwy. (9-27)
McGEHEE ARPT: Cattle on fld intermittently. (9-6)
NEWPORT-ERWIN FLD: Use rnwys only-cattle on fld. (10-23)

SPRAGUE-SPRAGUE ARPT: Entire fld rocky-dangerous. Emerg. use only. (10-21)
TACOMA-BARRY'S SKYHARBOR ARPT: Right traffic, W take-offs and landings. (10-21)
TOLEDO-WINLOCK SITE 63B, SF-SA: Sodded portions fld soft. Use rnwys only. (11-19)
TONASKET ARPT: Right traffic S or SW take-offs and landings. (10-21)
VANCOUVER-PEARSON ARPK: ESE/WNW strip under const. (10-21)
WALLA WALLA AFF: No opers office. (9-3)
WENATCHEE-PANGBORN FLD: Apron and parking areas being enlarged. Equip. on fld. Use taxiways with ctn especially at ngt. (9-16)
WESTPORT ARPT: Driftwood on fld after extremely high tides. (10-21)
WHIDBEY ISLAND NAS-AULT FLD: Bcn operates during IFR and from sunset to sunrise. Warm-up aprons avail. for all rnwys. (4-3)
WILBUR ARPT: Taxiway const W side of strip. (4-25)
YAKIMA CO. ARPT: Equip. on fld 0800 to 1700 Mon thru Fri. (11-21)
[redacted]: CHARLESTON-RADIO: Visual-aural VHF rng in cont oper for test purposes only. Freq. 108.7 mcs, ident. "KN"
CHARLESTON-BOLLINGER FLD: Lgts on 240' twr Rdo Stn WKNA 5 mi N inop. (7-28)
CHARLESTON-KANAWHA CO. ARPT: Fld now open. Acft unable to ctc twr should observe lgt signals. Equip. on fld days. Lgts on req by ctcg Charleston rdo. (11-9)
CLARKSBURG-PATTON FLD: Right traffic on landings to the S. (8-5)
ELKINS ARPT: Ctc Elkins Rdo or circle fld before landing (3-14)
PARKERSBURG-RADIO: Visual-aural rng on 109.1 mcs, ident. "PV" operating for test purposes only. (9-27)
WESTON-LOUIS BENNETT ARPT: Soft spots after continuous hvy rains. (4-10)

[redacted]: WHEELING-RADIO: Ctn-visual-aural rng unmonitored. (4-9). Freq. 108.3 mcs; ident. "WN".
[redacted]: BARABOO-BELL AERO SERVICE ARPT: Use ctn during wet weather and during spring thaws. (10-22)
BUTLER-CURTISS-WRIGHT ARPT: Closed ngts. (7-7). 628' twr Rdo Stn WTMJ/FM being erected atop Richfield Hill (1040' MSL), 12 mi NW (319° true). Temp lgtd during const. Unmrkd long guy wires attached to twr. (10-27)
CAMP McCOY ARPT: Emerg use only-not maintained. (10-6)
CLINTONVILLE ARPT: Equip. on fld extending NW/SE rnwy. Use ctn-observe grade stakes NW corner fld. (10-6)
GREEN BAY-NICOLET ARPT.: New fld 1 mi N. Use strips only, soft after hvy rains. E/W strip being extended to 4000'. (10-22)
LA CROSSE INT FLD, SITE 23-A, CO-TWIN CITIES: Snow fence erected 50' W of E bndry entire length of fld. E bndry lgts moved in to snow fence. (11-10)
MADISON ARPT: Use rnwys only. Grass area 75' wide adj to rnwys rough, bal of grass areas unsafe and rough. Svcg not avail. 2230 to 0700 daily with the exception of Thurs when svcg is not avail. after sunset. (11-4)
MADISON-MOREY ARPT: Use strips only. (10-28)
MILWAUKEE-GENERAL MITCHELL FLD: Equip. on fld days. Right turn procedure rstd to locally based acft. All acft land according to tetrahedron unless otherwise instructed by twr. All pilots must register in Admin Bldg upon arval and dptr. Position lgts must be turned on and operating between sunset and sunrise for all flgts to and from fld. Rdo rcvr rqrd for all locally based acft. S taxi strip closed. Equip. grading and leveling S portion fld and new exten beyond Grange Ave. New NNE/SSW 6700' strip closed. Army twr lctd W side fld closed and should not be confused with CAA twr lctd N side fld. Floodlgts S end N/S rnwy inop. (10-23)
OSHKOSH-WINNEBAGO CO. ARPT: Use rnwys only. All traffic left hand 600'. (11-17)
PLYMOUTH-CHAPLIN'S ARPK: Only E/W strip avail. (7-7)
SEXTONVILLE-RICHLAND FLYING CLUB INC.: N/S strip soft-avoid when wet. (10-9)
SHAWANO ARPT: Soft when wet-use rnwys only. (10-6)
THREE LAKES ARPT: Const. (10-23)
TOMAH ARPT: N/S strip soft when wet. (10-8)
WAUKESHA CO. ARPT: Make first turns to left after landing and taxi on right side of rnwys to parking area. (10-29)
WAUPUN ARPT, new: Soft after hvy rains. (10-14)
[redacted]: CASPER AFF: All rnwys unmrkd. (11-17)
CASPER-WARDWELL FLD: Use rnwys, taxi strips only, bal fld rough. 40' unlgtd pole erected at 30 million candle pwr ceilometer projector 1000' N of hangar. (4-8)
★CHEYENNE ARPT-RADIO: Nov. 11, the freqs of the inner and outer mrkr compass lctrs of CAA ILS were changed to 201 and 219 kcs. FLD: Equip. on fld days. Lgtd bldg between E/W rnwy and taxi strip, 1000' from E end. (7-7)
FORT BRIDGER ARPT: Pwrline under const approx 0.3 mi SW of end NE/SW rnwy and approx 30' high, unlgtd. (11-3)
JACKSON MUN. ARPT: Cattle on fld intermittently. (8-13)
RAWLINS ARPT: Equip. on rnwys. (4-17)
★ROCK SPRINGS-RADIO: Adtnl VHF voice fac avail. on 111.1 mcs. (11-14)
★ROCK SPRINGS MUN. ARPT-RADIO: CAA ILS flgt-checked and comm. Nov. 10. Voice-equipped lclzr lctd 400' W of the W end of E/W rnwy, lat. 41-35-54, long. 109-04-54. Elev 6721' MSL. Freq. 110.3 mcs, ident. "RT". Mag. approach bear. 254°. Glide path freq. 335 mcs, lctd 894' W of approach end and 400' S of centerline of E/W rnwy. Intersects outer mrkr at approx 7850' MSL. Glide path and lclzr monitored. Middle mrkr keyed alt dots and dashes lctd 3706' E from approach end of E/W rnwy. Modulation 1800 cps. Outer mrkr keyed 2 dashes per sec, lctd 23,776' E from approach end of E/W rnwy. Modulation 400 cps. Middle and outer mrkrs monitoring will be added later. Outer compass lctr to be installed later date. (10-3) FLD: Approach lgt lane operates whenever ceiling of 1000' or less and visibility of 3 mi or less prevails regardless of rnwy to be used and at other times on call. (9-22)
SHERIDAN CO. ARPT: N/S rnwy unsafe heavy acft. Taxi strips parallel all rnwys except N/S rnwy and terminate at ramp. Equip. on fld intermittently. Ctc Sheridan rdo for fld lgts. (2-6)
SINCLAIR-RADIO: Courses aligned by grnd check only. (11-18)
WORLAND ARPT: Strips under const. Equip. on strips days. Use with ctn. (5-21)

NOTAM CHARTS

These six notam charts spot all new or discontinued airports, radio navigational aids, danger areas, and (by use of the Ⓡ symbol) all such airports or aids which are temporarily unusable or usable only with extreme caution. Only danger and caution areas and Ⓡ symboled facilities, however, are cumulative in nature. That is, a new danger or caution area is spotted until the pertinent sectional chart is revised semi-annually.

Other features, such as new airports or radio aids, will be retained on the notam charts only as long as they are cited in the Notices to Airmen. Such citations are normally carried in only one issue of the Guide. Continuing very hazardous conditions, however, (such as field closed because of construction or radio range inoperative) will be charted as long as they are effective.

U. S. COAST AND GEODETIC SURVEY
DEPARTMENT OF COMMERCE

DISTRIBUTION OF AERONAUTICAL CHARTS

The aeronautical charts published and distributed by the Coast and Geodetic Survey are essential aids to navigation and are designed to be read easily by the pilot in a rapidly moving airplane. In the interest of safety to the aviator every effort is made to maintain the highest possible degree of accuracy of the charts in both aeronautical and base data. Before a chart is printed, it is thoroughly checked with the latest authentic information available, such as new surveys, flight check, and other sources. Special attention is given to important aids to air navigation which are added or changed as required.

Strict supervision is maintained of the distribution of the charts to prevent the issue of those charts which have been declared obsolete by the Bureau. Distribution of aeronautical charts is made only through Authorized Agents, the Washington Office and district offices of the Bureau.

It frequently occurs that after a chart is printed, issued, and in the hands of the agent, later information is received which makes necessary pertinent changes in the chart. These corrections to the charts are published in the AIRMAN'S GUIDE issued bi-weekly by the Civil Aeronautics Administration. Changes constituting a hazard to air navigation will continue to be shown in the Guide only until a new edition of the chart can be prepared and printed.

The new editions of charts incorporating all changes and corrections to date supersede all previous editions. New editions of the sectional and world aeronautical series are issued every six months on a regular revision schedule. When the information on a chart has become obsolete, further use of this chart for air navigation becomes a definite hazard. The safety of both the pilot and the public makes it imperative that obsolete charts be replaced by new charts as soon as they are issued. Hence, one of the most important items on a chart is the date printed in large red type in the lower right margin. Frequently a date in smaller red type is also shown to indicate that a new print with non-hazardous changes was made but does not cancel or supersede the previous edition.

The Coast and Geodetic Survey publishes a bi-weekly list of Dates of Latest Prints of charts which may be consulted in any authorized agency. A list of the Dates of Latest Prints is published in the first edition of the AIRMAN'S GUIDE for each month. By checking the date of a chart against this list, pilots may know if the chart is current. This is important to the aviator for his guidance in purchasing only the latest edition of a chart. A copy of the present list of dates and a list of Authorized Agents throughout the country will be furnished free upon request. Indexes showing the chart limits and descriptive matter concerning the various series of charts are also available without charge.

The Authorized Agents of the Coast and Geodetic Survey are rendering a distinct public service to aviation by the distribution of aeronautical charts in their respective localities. Their cooperation in promoting the sale of the latest editions of aeronautical charts contributes immeasurably to safety in flight operations. They are notified without delay when a chart becomes obsolete and therefore hazardous to air navigation which results in the unsafe chart being withheld from sale. Success in furthering an adequate aeronautical charting program requires that only charts with up-to-date aeronautical data be used in air navigation. This can be accomplished only by the purchase of charts through officially designated channels. It is therefore strongly urged that all charts used by pilots and navigators in aeronautical operations be obtained from Authorized Agents or offices of the Coast and Geodetic Survey.

DEPARTMENT OF COMMERCE
U.S. COAST & GEODETIC SURVEY

INSTRUMENT APPROACH AND LANDING CHARTS SUBSCRIPTIONS

Instrument Approach and Landing Charts of the continental United States are now being distributed on an automatic subscription basis at $20.00 per year for a complete set of one each of these U. S. charts of which approximately 500 IA&L charts are now available. Subscriptions will include an initial issue of all charts that are available at the time the subscription is received as well as all new charts and revisions of any U. S. IA&L charts printed during a year.

In addition, annual subscriptions will be priced at 5 cents per year per chart when ordered in quantities of 20 or more copies of each chart selected. A grouping of different quantities of various charts to total 20 will not be accepted as a subscription. Subscriptions will include all revisions during the year of the charts selected.

All subscriptions must be paid for at the time of placing the order and will not be honored unless accompanied by the proper remittance. No discount will be allowed on subscriptions.

It is estimated that two revisions will be made of each chart per year, but if conditions do not warrant the issue of more than one revision it is understood that only one will be made.

Orders for other than a complete set or sets, of for quantities less than 20 copies of each selected chart or charts will not constitute a subscription and must be purchased as individual orders at 5 cents each with the usual 33-1/3% discount on gross orders of $10.00 or more in one shipment to one address.

When placing an order, please mark clearly "Subscription" in order that it will not be handled as an individual order.

AERONAUTICAL CHARTS

U. S. Coast and Geodetic Survey

Dates of Latest Prints

Dates in small type indicate minor changes which are not of sufficient importance to make the previous print obsolete. All charts carrying dates older than those shown in large type on this list are obsolete for use in flight.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service.

CAA GCA UNITS

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force

(N) " (with N in Type column) - Owned or leased totally by Navy

(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard

(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.

(N) " - Open to civilians but owned or leased wholly or in part by Navy

(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.

(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.

(P) " - Civil airport open to military aircraft. (See Note 2).

★ " - C.A.A. Intermediate Field.

*Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

N.B. Airports with no prefix are exclusively civil airports.

TYPE

A	- U.S. Air Force	M	- Municipal
CG	- Coast Guard	N	- Navy
C	- Commercial	NG	- National Guard
I	- Intermediate	P	- Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

Class	Strip Length	Runway (Paved) Length
5-1	Less than 1800'	Less than 1800'
1	1800-2699'	1800-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

RUNWAYS

Actually only hard-surfaced or paved landing areas are runways. Unstabilized (sod, clay, gravel, etc.) landing areas are strips. In "longest" column is stated length of longest landing area in hundreds of feet.

"h" indicates landing area is hard-surfaced or paved.

"aw" indicates allway field.

FACILITIES AND SERVICING

RADIO

R1: Control tower voice
R2: Range (or H facility) with voice
R3: Range (or H facility) and tower
R4: Range (or H facility), tower, and ILS

LIGHTS

L : Incomplete lighting, such as flood and/or portable or fixed
L1: Beacon only strip or runway lights.
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

(Any 3 combination in parenthesis indicates only part time or irregular attendant)

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS

(a) "91 oct." indicates fuel octanes available. "USAF", or "Navy", following octane indicates USAF or Navy contract fuel available.

(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency.

(c) "Port. B-2 lights" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway, or strips.

(d) "TEMP INACT. NO FACS." indicates USAF airfields used either exclusively by the USAF or municipal airfields used jointly by the USAF and civil interests at which both the USAF and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned.

(e) "USAF TEMP INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and civil interests at which the USAF facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernable for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.

(g) "Fld lights on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the field lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.

NOTES

1. ← Notam data revising previous issues.**
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, L5-D" in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Many personal use fields are not covered in the Airman's Guide because they are impermanent in nature and have little value as emergency landing areas.
6. "(Formerly Army)" or "(Formerly Navy)": These former Army and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

**At the bottom of the second column, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

NOTICES TO AIRMEN

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, ATTN: Flight Operations Division, A-3. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-1 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 61-4, USAF aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA AND AZORES - Brookley Field, Ala., MacDill Field, Fla., Washington **National Airport, D.C., or Westover Field, Mass. ALASKA - McChord** Field, Wash., **or Great Falls AFF, Mont.** BERMUDA **- Mitchel Field,** N.Y., **Brookley** Field, Ala., **MacDill** Field, Fla., **Washington** National Airport, D.C., **Westover** Field, Mass., or Fairfield-Suisun **AFF, Calif. CANADA - Great** Falls AFF, Mont., Brookley Field, Ala., McChord Field, Wash., **Washington** National Airport, D.C., Selfridge Field, Mich., or Westover Field, **Mass.** CANAL **ZONE**, CENTRAL AMERICA, MEXICO AND SOUTH AMERICA **- March** Field, **Calif.**, MacDill Field, Fla., Kelly Field, Tex., or Brookley **Field, Ala. CARIBBEAN -** Brookley Field, Ala., Kelly Field, Tex., or MacDill Field, Fla. **ENGLAND, GREENLAND,** ICELAND, AND NORTH IRELAND - Washington National Airport, **D.C., or Westover Field, Mass.** NOVA SCOTIA AND NEWFOUNDLAND - Washington **National Airport, D.C., Westover** Field, Mass., Selfridge Field, Mich., or Brookley **Field, Ala. HAWAII - Fairfield-Suisun AFF,** Calif. EUROPEAN THEATER - Brookley Field, **Ala, MacDill Field, Fla., Washington** National Airport, D.C., **or** Westover Field, Mass.

CLEARANCE OF USAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with **notification from Chief of Staff, U.S.** Air Force, July 2nd AF Letter 63-9 has been rescinded **and the following instructions will** govern the clearance of USAF aircraft in the New York **City Area. For clearance purposes** into or from the New York City Area (encompassed **by a 25 mile radius from the southern** tip of Manhattan), VFR is defined as ceiling at least **2000' and** visibility **3 miles or more;** IFR when the visibility is not less than one mile and **the ceiling is** unlimited, **or** when the ceiling is not less than 5000' and the visibility not less than **2 miles.** USAF aircraft flying into the New York City Area may be cleared to any authorized field therein provided weather conditions are not less than those defined above. In all **cases** in-flight approval from Olmsted Flight Service Center by contacting Olmsted Airways, Rome Airways, Westover Airways, Mitchel Airways, or Ft. Dix Airways must be obtained prior to proceeding to the field of destination. All pilots whose destination is an airfield within the area will indicate on the AF Form 23 that their flight plan to the field of destination is via any of the 5 stations listed. Flights for which the point of first intended landing is Mitchel Field may be made using normal clearance procedure and restrictions outlined herein are not applicable to that station. Appropriate clearance may be made from a field at which weather conditions meet above specifications even though weather in other sections is below specified minimums. USAF aircraft engaged in regularly scheduled transport flights under the operations control of the Air Transport Command are exempt from these restrictions.

✓ Indicates new or revised Special Notices

SPECIAL NOTICES

V.H.F. CHANNEL ASSIGNMENTS: Following are U.S. AF assignments:

CHANNEL	AF FREQUENCY	CHANNEL	AF FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical with those established by the Civil Aeronautics Administration. Action is being **taken** to amend pertinent USAF flight information publications to show these minimums.

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3 or Pilots Handbook, USAF policy states that the "Regular - Day" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

✓ **CORRECTIONS TO USAF T.O. 08-15-1:**

(1) Correct page 86, by showing Walla Walla AFF, Washington, Gnd/Air station operating on VHF Channels C-A-D, and on 4765 kcs.

(2) Correct page 39, by including Brandywine range thereon.

✓ **CORRECTIONS TO USAF T.O. 08-15-3:**

(1) Correct Tucson (Davis-Monthan Field), Ariz., procedure, so as to conform to procedure of June 12, 1947, shown in PHACUS, Southwest.

(2) Correct Barksdale Field, La., instrument approach procedure chart, by showing the Elmgrove FM on the chart on the SE leg six miles from the radio range station as the point of beginning of procedure turn; by showing the NE/SW radio range courses at 323° and 143°; and by showing the final approach altitude as 1003' rather than 800'. (This also corrects PILOTS HANDBOOK).

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9 July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the Civil Aeronautics Administration.

In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

V.H.F. CHANNEL ASSIGNMENTS: Following are Navy assignments:

CHANNEL	NAVY FREQUENCY	CHANNEL	NAVY FREQUENCY
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	128.70	9	143.74
5	143.28	GUARD	140.58

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions, or existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction; or merely a burned-out obstruction light or a runway partially unusable because of construction. Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood, or snow, a runway closed because of construction, or the erection of a pole line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public and the data may be checked from an engineering standpoint for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

✓ DIRECTORY OF AIRPORT NOTAMS: Because of space limitations, the airport directory perforce serves as a notam supplement. Notam data revising previous directory issues are indicated by prefixed arrows. The only airport data (other than temporary conditions) carried in the Notices to Airmen section are coordinates (latitude and longitude).

✓ ASSUMPTION OF CONTROL OVER RED CIVIL AIRWAYS NOS. 57 and 63: Effective 0001 EST. December 16, 1947, control will be assumed over Red Civil Airway #57 - Cleveland-Detroit Air Route Traffic Control Area Boundary will be established at 28 miles NW of Toledo, Ohio radio range station. Detroit-Chicago Air Route Traffic Control Area Boundary will be established at 7.0 miles SE of Milwaukee, Wisc.

Effective 0001 EST, December 16, 1947, control will be assumed over Red Civil Airway #63 - Toronto-Detroit Control Area Boundary will be established at 25 miles E of Sarnia, Ont. radio range station. Detroit-Chicago Air Route Traffic Control Area Boundary will be established at Bangor FM, the intersection of the NE course of Chicago and the SW course of Grand Rapids radio range stations.

✓ RELOCATION OF AIR ROUTE TRAFFIC CONTROL AREA BOUNDARIES: Effective 0001 EST, December 16, 1947, the Detroit-Chicago Air Route Traffic Control Boundary will be relocated as follows: On Red Civil Airway #19 to 25 miles N of the Union intersection; the intersection N of the E course of South Bend, and the N course of Goshen, Ind. radio range stations.

Detroit-Chicago Air Route Traffic Control Boundary will be relocated as follows: On Red Civil Airway #28 to the Bangor FM.

Detroit-Chicago Air Route Traffic Control Boundary will be relocated as follows: On Blue Airway #6 to the Bangor FM.

✓ REDESIGNATION OF CIVIL AIRWAYS: Effective December 1, 1947, Part 600 of the Regulations of the Administrator was amended to read in whole or in part as follows:

(1) Green Airway #3 (San Francisco, Calif., to New York, N.Y.) . . . Moline, Ill.; intxn SE course of Rockford, Ill., and the W course of Chicago, Ill.; Joliet, Ill.; intxn SE course of Rockford, Ill., and the W course of Goshen, Ind.; Goshen, Ind.; . . .

(2) Amber Airway #2 (Long Beach, Calif., to Fairbanks, Alaska). . . Silver Lake, Calif., range station; the intxn NE course of Silver Lake, Calif. and the SW course Las Vegas, Nev.; Las Vegas, Nev. range station . . .

(3) Amber Airway #5 (New Orleans, La., to Milwaukee, Wis.) . . . Joliet, Ill.; the intxn N course Joliet, Ill., and the S course of Milwaukee, Wis., to Milwaukee, Wis. range station.

(4) Red Airway #12 (Kansas City, Mo., to Detroit, Mich.) . . . Burlington, Iowa; Joliet, Ill.; the intxn NE course of Joliet, Ill., and the W course of South Bend, Ind.; South Bend, Ind. range station to Romulus, Mich.

(5) Red Airway #14 (Lone Rock, Wis. to Louisville, Ky.) From Lone Rock, Wis., via Rockford, Ill.; the intxn SE course Rockford, Ill., and the W course Chicago, Ill.; Chicago, Ill. range station. Indianapolis, Ind. range station to Louisville, Ky. range stn.

(6) Red Airway #15 (Las Vegas, Nev., to Gila Bend, Ariz.) From Las Vegas, Nev., range station.; the intxn SE course of Las Vegas, Nev., and the W course of Prescott, Ariz. From Prescott, Ariz. range station . . .

(7) Red Airway #28 (Rockford, Ill., to Grand Rapids, Mich.) From Rockford, Ill., to the intxn of the E course of Rockford, Ill., and the NW course of Chicago, Ill. From Chicago, Ill. range station . .

(8) Red Airway #42 (Joliet, Ill., to Lafayette, Ind.) From the intxn of the SE course of Rockford, Ill. and the W course of Goshen, Ind., to the intxn of the SE course of Rockford, Ill., and the SE course of Chicago, Ill.

(9) Red Airway #43 (Chicago, Ill., to Lafayette, Ind.) From the intxn of the E course Rockford, Ill., and the NW course of Chicago, Ill., via the intxn of the E course of Rockford, Ill., and the N course of Harvey, Ill.; Harvey, Ill. range station to the intxn of the S course of Harvey, Ill., and the SE course of Rockford, Ill.

(10) Red Airway #57 (Moline, Ill., to Toledo, Ohio) From Moline, Ill., via Rockford, Ill.; Milwaukee, Wis.; Battle Creek, Mich., to Toledo, Ohio.

(11) Red Airway #58 (Salinas, Calif., to Hollister, Calif.) From Salinas, Calif. VHF range station to the intxn of the NE course of Salinas, Calif. VHF range station and the SE course of Oakland, Calif.

(12) Red Airway #60 (San Jose, Calif., to Stockton, Calif.) From the intxn of the NW course of Salinas, Calif. VHF and the W course of Moffett Field, Calif., to Moffett Field, Calif. From Oakland, Calif., via Stockton, Calif., to the intxn of the E course of Stockton, Calif., and the SE course of Sacramento, Calif.

(13) Red Airway #63 (Battle Creek, Mich., to U.S.-Canadian Border) From the intxn of the SW course of Grand Rapids, Mich., and the W course of Battle Creek, Mich., via Battle Creek, Mich. range station; the intxn of the E course of Battle Creek, Mich., and the W course of Salem, Mich. VHF; Salem, Mich. VHF range station; to the intxn of the E course of Salem VHF, Mich., and the NW course of Windsor, Ont. From the intxn of the NW course of Romulus, Mich. and the W course of Sarnia, to the U.S.-Canadian Border.

(14) Blue Airway #14 (El Centro, Calif., to Sacramento, Calif.) . . the NW course of Palmdale, Calif., and the S course of Bakersfield, Calif. From the intxn of the NW course of Fresno, Calif., and the S course of Stockton, Calif., via Stockton, Calif., to the intxn of the N course of Stockton, Calif., and the SE course of Sacramento, Calif.

(15) Blue Airway #51 (Wendover, Utah, to Pocatello, Idaho) From the intxn of the E course of Wendover, Utah., and the S course of Lucin, Utah, via Lucin, Utah range stn; the intxn of the N course of Lucin, Utah, and the SW course of Burley, Idaho; Burley, Idaho, range station; the intxn of the NE course of Burley, Idaho, and the SW course of Pocatello, Idaho, to Pocatello, Idaho range station.

(16) Blue Airway #52 (Paso Robles, Calif., to Fresno, Calif.) From the intxn of the SE course of Salinas, Calif. VHF and the SW course of Fresno, Calif., to the Fresno, Calif. range station.

DUPLICATE AIRMAN CERTIFICATE AND RATING RECORD FEE: The fee for duplication of an airman certificate and rating record which has been lost, mutilated or destroyed is now one dollar. All airmen should be guided accordingly when making remittance for duplicates. The notation on the reverse side of the airman certificate and rating record form stipulating a fee other than one dollar for both certificate and rating record is to be disregarded. In future reprints of the form, the notation will be revised to indicate one one dollar for duplication.

Duplicate medical certificates are issued only at the discretion of the examining physician. Requests for such duplicate certificates should, therefore, be made directly to the physician who performed the examination.

SEAPLANE OPERATIONS: Because of the possibility of local ordinances or restrictions prohibiting seaplane operations in resort or congested areas, the Administrator has issued the following advice to seaplane operators:

"1. Take off as far out from the shore as possible.

2. Cut the takeoff run as short as safety permits.

3. Fly high enough to avoid criticism from residents below, or arrange the flight plan so that you pass over as few houses as possible.

4. Avoid unnecessary 'gunning' or racing of the engine.

5. Explain carefully to those who complain what you are doing to make your airplane a good neighbor.

In the CAA-Federal-Aid Airport program, we are promoting the use of seaplanes by assisting communities in establishing inexpensive docking and servicing facilities. In view of the high utility value of the seaplane or amphibian, we believe this to be a definite step in the advancement of personal flying in general. Hence, if we are to find acceptance of such facilities, it is up to those pilots who now operate seaplanes to assist us to the utmost by safe and considerate operation of their aircraft."

N.B. The Administrator's admonition was occasioned by numerous complaints received from lake-side residents and vacationists.

CONTROL TOWER TUNING PRECAUTION: On some aircraft receivers, the channel of 278 kcs is identified as ' tower", on the tuning control nameplates. This is not always correct as many towers transmit on frequencies other than 278 kcs. Reports indicate that some confusion is being created by the failure of pilots to tune their receiver to the tower transmitting frequency when such frequency is other than 278 kcs. It is suggested that pilots use care and make certain that they are tuned to the transmitting frequency of the tower with which they desire to communicate.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges.

If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

PRIVATE FLIER VHF FREQUENCIES: Practically all CAA Communications Stations and Towers guard the new private flier frequencies of 122.1 mcs for transmission to CAA Communications Stations and 122.5 mcs for transmission to CAA operated towers. The few stations not yet equipped with the new receivers should be fully implemented within the next month.

CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs in addition to towers' low frequencies.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

F.C.C. DF STATION: Federal Communication Commission monitor station relocated from former location South Miami to Richmond, Florida. This facility is being operated on intermittent basis until further notice.

TWO-WAY RADIO FAILURE PROCEDURES: In the event of failure of two-way radio communications between an aircraft and the ground, the pilot will observe one of the following procedures: (a) If operating under VFR conditions, proceed under VFR and land as soon as practicable, or

(b) Proceed according to the latest air traffic clearance.

If the pilot proceeds according the latest traffic clearance but has not received and acknowledged a clearance to the tower and if other instructions to the contrary are not received, he shall be expected to observe the following and control will be effected accordingly: (1) If the pilot has received and acknowledged a clearance to the destination airport or the radio facility serving that point, he shall continue flight at the altitude(s) last assigned by Air Traffic Control, or the minimum instrument altitude, whichever is the higher, to the radio facility serving the destination airport.

(2) If the pilot has received and acknowledged a clearance to a point other than the destin. airport or the radio facility serving the destination airport, he shall continue flight at the altitude(s) last assigned by Air Traffic Control or the minimum instrument altitude, whichever is the higher, to the radio facility serving the destination airport.

(3) If holding instructions have been received, the pilot shall comply with these instructions until such time as it will be necessary to continue flight so as to arrive at the radio facility serving the destination airport at the expected approach time last received and acknowledged, maintaining the last assigned altitude or the minimum instrument altitude, whichever is the higher,

(4) If holding instructions have been received, but no expected approach time has been received, the pilot shall comply with these instructions until the time Air Traffic Control has specified that further clearance may be expected. He shall then continue, maintaining the last assigned altitude or the minimum instrument altitude, whichever is the higher.

NOTE: The minimum instrument altitude referred to is the minimum established for that portion of the route over which the operation is conducted, regardless of the direction of flight.

Approach: Descent from the altitude maintained to the radio facility serving the destination airport shall be made on the final approach course and shall start at the expected approach time last received. If no expected approach time was received, descent shall be started at the last estimated arrival time specified by the pilot, or as soon as possible thereafter. A full standard instrument approach should be executed unless a VFR approach can be made.

If a clearance to the tower at the airport of intended landing has been received and acknowledged, the pilot shall be expected to comply with any special instructions contained in the clearance and make normal descent for landing.

NOTE: Air Traffic Control may issue appropriate instructions to be broadcast 'blind' over air carrier radio facilities (for air carrier aircraft), and over suitable radio range facilities. Instructions must not be broadcast unless Air Traffic Control authorizes such broadcast.

AERONAUTICAL CHART AND PUBLICATION CORRECTIONS:

(1) Correct Coast and Geodetic Survey Radio Facility Mileage Chart, dated October 23, 1947, by including Missoula, Montana, and the mileage from Missoula to Craig intersection on Red Airway #48 should be 107 miles.

(2) Correct Coast and Geodetic Survey's Tallahassee, Fla., Dale Mabry Field approach and landing chart (AL-415) by showing the beacon north of field commissioned. Beacon S of the field is inoperative.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long.	Elev.	Action Taken
Hayesville, Ohio	Hourly			Discontinued
Boca Raton, Florida	Hourly			Discontinued
Lamar, Colorado	3-hourly & SW	38-05, 102-57	3620'	Begun
Custer, Mont. (Int. Field)	Hourly	46-08, 107-31	2868'	Inaugurated
Worcester, Mass. (Worcester Airport)	Hourly	42-16, 71-53	1009'	Inaugurated
Wilmington, N.C. (Bluethenthal Field)	Hourly	34-16, 77-55	25'	Inaugurated
Myrtle Beach, S. C.	Hourly	33-41, 78-56	24'	To be inaugurated soon
Biloxi, Miss.	Pibal	30-25, 88-55	23'	Begun
Mansfield, Ohio (Mansfield Airport)	Hourly	40-49, 82-30	1300'	Inaugurated

NOTE: Hourly in lieu of SW reports now available from San Angelo, Texas (Mathis Field).

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with 2-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off.

(b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See AFF Regulation 100-4, dated March 4, 1944, and C.A.R. Digest or Manual 60).

(c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons, indicate that the ground visibility is less than 3 miles and a traffic clearance is necessary to enter the traffic pattern of airports within the control zone.

FOREIGN SPECIAL NOTICES

INTERNATIONAL NOTAMS: The only source of international notams are the C.A.A. Overseas-Foreign Aeronautical Communications Stations at the following locations: New York, N.Y.; Miami, Fla.; New Orleans, La., Balboa, Canal Zone; San Francisco, Calif.; Seattle, Wash., Honolulu, Hawaii; Anchorage, Alaska.

✓ OVERSEAS FOREIGN COMMUNICATIONS STATION BROADCAST: See item under Everett, Washington.

✓ NEW YORK INTERNATIONAL NOTAM OFFICE: New York International Notam Office (NOTOF KNYC) established November 24, 1947. Postal address: Overseas Foreign Aeronautical Communications Station, CAA Building, La Guardia Field, New York, N.Y. U. S. Territory, for which responsible, CAA Regions One and Three, comprising states of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, Kentucky, Ohio, Indiana, Michigan, Illinois, Wisconsin, Minnesota, North Dakota, and District of Columbia. Notam information concerning U.S. Aerodrome listed in compilation "Designated International Aerodromes", dated March 21, 1947, is available. Foreign recipients of this notice should advise from what designated U.S. territory International Aerodromes Notams are desired. U.S. and Canadian recipients of this notice should advise from what Overseas and foreign points, designated as International Aerodromes, Notams are desired.

INTERNATIONAL RADIO CALL SIGNS: Current International Communication Procedures in force prescribe the use of full five-letter call sign in establishing communications with another station. Abridged call sign consisting of first and last two letters of the five letter call sign may be used only after communications established. First call letter must, in all cases, be the national designating call letter.

FOREIGN ENTRY PROCEDURES, AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Volume 2, Number 1, dated July 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

ALABAMA

ATHENS: E/W strip soft in wet weather. (10-14)

BIRMINGHAM-RADIO: VHF omni-directional rng without voice operates on test basis, fac unmonitored, and subject to interruptions; not to be used for navigational purposes. Freq. 116.3 mcs. ident. "BH".

BIRMINGHAM ARPT: Closed to civil acft not equipped with operating rcvr. Landing on sod areas approved by twr in dry weather, unsafe in wet weather. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. (11-6)

BRIDGEPORT-ALA-TENN-GA ARPT: Ctn when wet. (10-14)

BROOKLEY FLD (MOBILE): Soft-use rnwys, taxi strips only. (10-28)

CENTRE ARPT: NNW/SSE strip closed. N side E/W strip rough. (10-14)

CRAIG FLD (SELMA). Bndry lgts inop. Fuel avail. on off. bus. only. (10-27)

FOLEY-OAK ARPT: W end E/W, N end N/S strips soft in wet weather. (10-14)

JASPER-WALKER CO. ARPT: Land inside of bndry mrkrs. Avoid new landing strip now being graded. (10-14)

LIVINGSTON-JACKSON FLD: Rolling and slightly rough. Soft spots along N side at SW end. (10-14)

MAXWELL FLD (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)

MOBILE-BATES FLD: N/S rnwy lgts inop. (8-26)

MONROEVILLE-LEGION FLD: Do not confuse golf course fairways with landing strips. (10-14)

SYLACUGA-SYLVAN ARPT: Lat. 33-10-30, long. 86-18-15.

TALLADEGA ARPT N 700' N/S strip soft in wet weather. (10-14)

WINFIELD ARPT: S end N/S strip soft in wet weather. (10-14)

ARIZONA: AGENCY PEAK, BCN SITE 3A, PH-EO: Effective Dec. 16, bcn 3 mi. SE of Sacatoon will be discont. (11-27)
CHEVROLET HILL, BCN SITE 211, PH-EO: Effective Dec. 16, bcn 5 mi E of Douglas will be discont. (11-27)
DAVIS MONTHAN FLD (TUCSON): E fld closed-acft parked on rnwys. Blinding ceilometer W end fld between ends of NW/SE, E/W rnwys. SAC acft under off. orders will be given full svcg; acft of other commands will be given sufficient fuel for lfgt to next fuel stop plus rqrd reserve. Obst lgt inop on 75' pole SE control twr. Former taxi strips 12R and 30L are now open as Rnwys 12R and 30L to be used by lgt acft and rstd to day opers only.(9-24)
GILA BEND AFF: Maj obsts S fld lgtd. (7-21)
LITCHFIELD PARK NAF: No landings permitted later than one-half hr before sunset without prior approval from C.O. No ngt opers. (10-3)
LUKE FLD (PHOENIX): Traffic direction indicator on 2nd hangar **from N not operating.** (10-15)
MESA-OASIS ARPT: **W end E/W, SW end NE/SW strips unsafe for a distance of 500'** (ditches across **ends**) **(7-24)**
PHOENIX: **Inst training on Phoenix Rng between 5500' and 9500'.**
PHOENIX-RADIO: **Visual courses of VHF rng not monitored. (8-18). Freq. 108.3 mcs, ident. "PH".**
★**PHOENIX-SKY HARBOR ARPT-RADIO: CAA twr grds 3105,4495,6210,3117.5 kcs, 116.1, 140.1, 118.5, 122.5, 126.18 mcs. (11-17). This corrects Airgl Vol. 2, No. 18. LAKEPORT-LAMPSON FLD: NW 800' NW/SE strip rough. (8-15)
LIVERMORE SKY RANCH ARPT: Avail. lgt acft only, except in emerg. (10-3)
LONG BEACH ARPT-RADIO: Soon, CAA ILS will be comm. Lclzr lctd 980' NW of end and extended center line NW/SE rnwy. Freq 110.3 mcs. Voice facs from twr are avail. on the lclzr freq. and cont ident. "HB" will be transmitted with a tone freq of 1020 cps except during voice transmissions. Glide path lctd 800' from SE end and 400' SW of center line of NW/SE rnwy. Outer mrkr keyed 2 dashes per second, lctd 28,645' from SE end of NW/SE rnwy, modulation 400 cps. Middle mrkr keyed alt dots and dashes, lctd 4041' from SE end NW/SE rnwy, modulation 1300 cps. Both mrkr on extended rnwy center line. Mag. approach bear. 302°. Outer mrkr compass lctr will be comm at a later date on 242 kcs, lctd at outer mrkr site. Ident. "H". (11-27) FLD: Approach lgt lane on the SE end of the NW/SE rnwy will be operative soon. All facs will operate cont. on a 24 hr. basis. (10-24)
LOS ALAMITOS NAAS (LONG BEACH): Closed 1630 to 0800 except in emerg. or by prior arrangement. Only Rnwy 22L open. Equip. on fld. (9-14)
LOS ANGELES ARPT: Ctn approach to Rnwy 29-two 25' poles at arpt bndry within this approach zone, unmrkd, unlgtd. Parked acft within approach zone to and parallel with S side Rnwy 29. Unlgtd oil derricks on approach to Rnwy 34. E/W paved strip S side fld avail. taxiing only. All landings, take-offs and taxiing rstd to paved areas. Rnwy 4-22 closed. Rnwy 11-29 avail. for day and ngt take-offs and day landings only. Equip. on fld days. (10-30)
LOS ANGELES-LOS ANGELES-LONG BEACH HARBOR EMERGENCY SEAPLANE LANDING AREA: May not be avail. on short notice due to congestion in anchorage area. Two hrs advance notice should be given if possible. (7-1)
LOWER LAKE-HOBERG ARPT: Take off to SSE-land to NNW. (7-11)
MARCH FLD (RIVERSIDE): Rnwy 7-25 closed-unavail. on twr permission only. No 100 oct.

[redacted]: avail. Rnwys 12L-30R closed 0730 to 1630. Inten. instrument flying training in AT-6 type acft days Mon. thru Fri. (11-5)
MARTINEZ ARPT: Unusable during rainy weather. (10-3)
MATHER FLD (SACRAMENTO): Use rnwys only-mat unserviceable. (1-29)
McCLELLAN FLD (SACRAMENTO): Rnwy 4-22 closed (parked acft). Equip. and parked acft adj all rnwys and taxiways. Shoulders, unsurfaced areas unsafe. (4-23)
MERCED MUN. ARPT-Daylgt oper of bcn is to warn local trans acft of approaching airline acft. Ctn, approach lgts inop. (8-24)
**MIRAMAR OLF: Lat. 32-54-30, long. 117-07-15. (7-9)
MODESTO ARPT: Rng lgts being installed across rnwy ends. Const and soft spots, mrkd. (10-3)
★MOFFETT FLD NAS-LTA-HTA (MT. VIEW)-RADIO: Dec. 4, courses realigned to: 20°, 110°, 200°, 290°. About Dec. 8, Morgan Hill Navy bone-shaped FM will be comm. on the SE course at lat. 37-10-09, long. 121-41-02, bear. and dist.: 290°, 24.8 mi., ident. 2 dashes. (12-3) FLD: Fld on positive control. Multi-engine acft above JRB class use Rnwy 14L-32R only, except in emerg. N connecting taxiway closed to all traffic. (6-17)
**MOJAVE ARPT: Lat. 35-03-45, long. 118-09-00. (6-3)
MONTEREY PENINSULA ARPT: Right traffic Rnwys 24,28, left Rnwys 6,10. (10-3)
MUROC AFF-RADIO: USAF rng unreliable and should be used for homing and training only. (10-30) FLD: Lctd within a danger area. Closed to all trans acft except on written permission Commanding General, Air Materiel Command. Acft will not carry trans passengers to this fld. (10-31)
NEEDLES ARPT: Equip. on fld days except Sun. Trenches along sides of rnwys near intersection. Acft remain on pavement. (12-4)
OAKLAND ARPT-RADIO: Dec. 4, CAA ILS outer mrkr will be shut down until Dec. 11 for relctn to new site 4.72 mi from approach end of Rnwy 27-9. (11-17). About Dec. 18, a middle mrkr fac will be comm 3500' from approach end of Rnwy 27-9. About Dec. 11, bndry mrkr will be discont. FLD: Rock surface area adj to Rnwy 27R avail. small acft. Adhere to instructions issued by twr. Maintenance facs avail. 0800 to 1800. Closed to acft not equipped with 2-way rdo except acft may land for repairs or fuel without rdo on permission from arpt supt. Rnwy 6-24 avail. lgt acft only. Hvy acft use rnwys, taxi strips only. Arpt channel unmrkd day, ngt. Turf areas between all rnwys avail. for emerg. use. (10-7)
OCEANSIDE-RADIO: __ Soon , concurrently with the comm of the La Jolla FM, the ident. of the Oceanside FM will be changed to two dots, four dashes. (10-13)
★ONTARIO-INTERNATIONAL ARPT-RADIO: Dec. 5, 120.7 mcs transmitter comm at Cl
** tower. FLD: Segmented circle NE of intersection of rnwys 25 and 21 with fixed wind tee in center with wind sock on top of wind tee designating rnwy in use. Tetrahedron SE of intersection designates wind direction only and not landing rnwy. (11-28)
PASO ROBLES-SHERWOOD FLD-40' unlgtd wires E end E/W strip. (10-3)
PLACERVILLE MUN. ARPT: Strip rutted-hazardous. (6-3)
RED BLUFF-BIDWELL ARPT: Rnwy ctc lgts unreliable. (11-24)
ROSEDALE OLF (SAN DIEGO)-CLOSED except in emerg. (9-27)
SACRAMENTO ARPT: Use rnwys, taxiways only-fld and shoulders soft. (10-16)
SACRAMENTO SKY RANCH ARPT: All rnwys under const. Trans acft land at own risk. Ngt flgt training until 2100 every ngt. (10-27)
SALTON SEA: Extensive bombing practice being conducted over Salton Sea from 0900 to 1600 daily. THIS ACTIVITY HAS NOT YET BEEN APPROVED BY THE AIR SPACE SUB-COMMITTEE. (11-26)
SAN DIEGO-SPECIAL NOTICE: Pilots flying into Lower Calif., Mex. must have Mexican Consular clearance into Mexico prior to flgt. Pilots not securing prior consular clearance will have their acft impounded upon landing in Mexico. For complete Mexico entry procedures see pages 127 and 128 of current "Flight Information Manual".
SAN DIEGO: Night fighter training being conducted within the following described areas: (a) A sector of a circle with radius of 40 mi centered at lat. 32-54-30, long. 117-07-24 extending clockwise between lat 32-20-00, long. 117-03-20, and lat. 33-18-20, long. 117-37-30, excluding those portions which lie within the confines of civil airways and S of the U.S.-Mexico bndry. (b) A sector of a circle with radius of 40 mi centered at lat. 32-54-30, long. 117-07-24 extending clockwise between lat 33-23-30, long. 117-26-30 and lat. 32-50-30, long. 116-26-30, excluding those portions which lie within the confines of civil airways.
SAN DIEGO-RADIO: Dec 19, La Jolla bone-shaped FM will be comm on the NW course of San Diego Rng at lat 32-50-44, long. 117-14-23, bear. 145°, 6.25 mi. Ident.

[redacted]: four dashes. (11-13)
SAN DIEGO-LINDBERGH FLD: Right traffic Rnwys 27, 31; left traffic Rnwys 9, 13. Mass flights of civilian acft prohibited unless prior arrangement made with arpt manager. (9-11)
SAN DIEGO NAS: Traffic circle oval in shape with left turns at 800'. Traffic pattern may be entered at any point at any angle not greater than 45°. Landing will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love (black and orange checkered floating pyramid) is lctd 1.5 mi S of Hotel Del Coronado. Acft crossing air traffic lanes at North Island must be above 1500'. Acft will not fly over Coronado or Amphibious Training Base at an alt of less than 1500'. Multi-engine acft land on heavy duty rnwys, single-engine acft on asphalt mat. (6-3)
SAN FRANCISCO ARPT-RADIO: CAA ILS will be comm Dec. 1, serving E/W rnwy with approach from E. Localr freq. 109.5 mcs with ident. "SF", transmitter lctd 220' from W end E/W rnwy. Glide path freq. 332.6 mcs, transmitter lctd 550' from E end E/W rnwy and 625' N of rnwy centerline. Outer mrkr will be lctd 0.6 mi from E end E/W rnwy, keyed 2 dashes per second, inner mrkr will be lctd 4550' from E end E/W rnwy, keyed alt dots and dashes. No bndry mrkr. Will oper cont. (10-17) FLD: W 2000' Rnwy 10-28 closed. New taxiway open from Rnwy 10-28 to new outer apron to S taxiway-avoid portion of shoulder from Rnwy 10-28 to new apron, mrkd by barricades. NOTAM CHARTS

These notam charts indicate:

(a) New radio navigational aids, by an X[1]
(b) New danger or caution areas
(c) Abandoned airports, by an Ⓡ [1]
(d) Discontinued radio navigational aids, by an Ⓡ [1]
(e) Airports or radio navigational aids temporarily unusable or usable only with extreme caution (or aids affected by a change of frequency, identification, quadrants, or range courses,) by an Ⓡ [2]

Only danger and caution areas and Ⓡ symboled facilities, however, are cumulative in nature, for example, a new danger or caution area is spotted until it is indicated on the next revision of the pertinent sectional chart.

Notams referred to by the Ⓡ symbol will be found in either the Notice to Airmen section or the Remarks column of the Directory of Airports section.

[1] New navigational aids or abandoned airports and aids are indicated in only one issue.

[2] Unusable airports and aids or airports and aids usable only with extreme caution are indicated as long as the hazardous conditions remain in effect.

This issue includes all data on record as of 0001 E.S.T. on the date above. For later information consult teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force
(N) " (with N in Type column) - Owned or leased totally by Navy
(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard
(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.
(N) " - Open to civilians but owned or leased wholly or in part by Navy
(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.
(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.
(P) " - Civil airport open to military aircraft. (See Note 2).
* " - C.A.A. Intermediate Field.

*Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.
N.B. Airports with no prefix are exclusively civil airports.

TYPE

A	- U.S. Air Force	M	- Municipal
C	- Commercial	N	- Navy
CG	- Coast Guard	NG	- National Guard
I	- Intermediate	P	- Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.
If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

Class B-1	Strip Length Less than 1800'	Runway (Paved) Length Less than 1800'
1	1800-2699'	1800-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

RUNWAYS

Actually only hard-surfaced or paved landing areas are runways. Unstabilized (sod, clay, gravel, etc.) landing areas are strips.
In "longest" column is stated length of longest landing area in hundreds of feet.
"h" indicates landing area is hard-surfaced or paved.
"aw" indicates allway field.

FACILITIES AND SERVICING

RADIO

R1: Control tower voice
R2: Range (or H facility) with voice
R3: Range (or H facility) and tower
R4: Range (or H facility), tower, and ILS

LIGHTS

L Incomplete lighting, such as flood or strip lights, which are generally available only on prior request
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel (Any S combination in parenthesis indicates only part time or irregular attendant)
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS

(a) "91 oct." indicates fuel octanes available. "USAF", or "Navy", following octane indicates USAF or Navy contract fuel available.
(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency.
(c) "Port. B-2 lights" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway, or stripe.
(d) "TEMP INACT, NO FACS," indicates USAF airfields used either exclusively by the USAF or municipal airfields used jointly by the USAF and civil interests at which both the USAF and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned.
(e) "USAF TEMP INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and civil interests at which the USAF facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.
(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
(g) "Fld lights on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the field lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.

NOTES

1. ← Notam data revising previous issues.**
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, L5-ID" in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Many personal use fields are not covered in the Airman's Guide because they are impermanent in nature and have little value as emergency landing areas.
6. "(Formerly Army)" or "(Formerly Navy)": These former Army and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

** At the bottom of the second column, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, ATTN: Flight Operations Division, A-3. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 61-4, USAF aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA AND AZORES - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. ALASKA - McChord Field, Wash., or Great Falls AFF, Mont. BERMUDA - Mitchel Field, N.Y., Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., Westover Field, Mass., or Fairfield-Suisun AFF, Calif. CANADA - Great Falls AFF, Mont., Brookley Field, Ala., McChord Field, Wash., Washington National Airport, D.C., Selfridge Field, Mich., or Westover Field, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO AND SOUTH AMERICA - March Field, Calif., MacDill Field, Fla., Kelly Field, Tex., or Brookley Field, Ala. CARIBBEAN - Brookley Field, Ala., Kelly Field, Tex., or MacDill Field, Fla. ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND - Washington National Airport, D.C., or Westover Field, Mass. NOVA SCOTIA AND NEWFOUNDLAND - Washington National Airport, D.C., Westover Field, Mass., Selfridge Field, Mich., or Brookley Field, Ala. HAWAII - Fairfield-Suisun AFF, Calif. EUROPEAN THEATER - Brookley Field, Ala, MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are U.S. AF assignments:

CHANNEL	AF FREQUENCY	CHANNEL	AF FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical with those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3 or Pilots Handbook, USAF policy states that the "Regular - Day" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

✓ AIR FORCE FIELD DESIGNATIONS: To date, names and designations of Air Force fields have not been changed as a result of change of Army Air Forces to U.S. Air Force. Listings of fields as previously furnished such as "Alamogordo Army Air Field" will be used until further notice.

✓ CORRECTIONS FOR AND ADDITIONS TO U.S.A.F. T.O. 08-15-1: (1) Correct the Directory of Airfields Available to Military Aircraft, in accordance with changes in data for A, N, NG, P, and CAA intermediate fields as indicated by prefixed arrow in the Airman's Guide.

(2) Correct page 42, by showing Will Rogers Tower, Oklahoma City, Okla., receiving only on Channel B (no transmitter on this frequency)

(3) Correct pages 10, 11, and 12, by showing frequency of Ottawa Tower, Ont., as 212 kcs.

(4) Correct page 20, under Remarks for Walla Walla, so that reference is made to page 85 rather than 185 for AACS, WXDG.

(5) Delete Special Notice entitled "Clearance of USAF Aircraft in New York City Area."

(6) Correct Salem, Mich. VHF Range Charts and data by showing Visual-Aural Range at lat. 42-24-29, long. 83-35-37, located 1 mi. W. Freq. 109.1 mcs, ident. "SVM". Visual courses: 82°, 262°; aural courses: 172°, 352°, unmonitored.

(7) Correct page 26, by changing the Remarks of GCA at Selfridge Field, Mich., to "Operational Air Force GCA, see page 86".

(8) Add to danger area charts the following Airspace Warning Area established in Meeting 92 of Airspace Subcommittee for aerial gunnery and bombing range off-shore Long Island, N.Y., used by Naval Air Station, Floyd Bennett: Beginning at lat. 40-00-00, long. 72-51-00, thence to lat. 40-16-30, long. 73-17-30, thence to lat. 40-30-00, long. 72-30-00, thence to lat. 40-00-00, long. 72-30-00, thence to lat. 40-00-00, long. 72-51-00, point of beginning.

(9) Correct Jackson, Miss. ILS localizer, from Channel X to Channel Y, 109.9 mcs.

✓ CORRECTIONS FOR AND ADDITIONS TO T.O. 08-15-02: (1) Correct page 32, El Centro, Calif., by showing operating hours as continuous.

(2) Correct page 32, AN/CPN-6 (YM) Beacons (X-Band) Domestic, by changing the listing of Morrison Field, Fla. to West Palm Beach, Fla., and by showing the facility as inop.

(3) Correct page 32, by adding under ILLINOIS the following: Location: Glenview; Position: 42-05-25 N lat., 87-49-30 W long.; Code: 2-2-1; Agency: USN; Hours: On request.

(4) Correct page 32, by showing the location of Corpus Christi, Tex., as 27-41-47 N lat., 97-16-12 W long., and the following remarks: Altitude 142'. Approx. 240° - 1 mile to field.

(5) Correct page 32, by showing under TEXAS the following: Location: Corpus Christi; Position: 21-41-47 N lat., 97-16-12 W long.; Code: 2-1-2-1; Operated by: USN; Angular coverage: 000° - 360°; Hours of operation: Continuous; Remarks: Atop bldg 350' at altitude of 142'.

✓ CORRECTIONS FOR AND ADDITIONS TO T.O. 08-15-03: (1) Correct page 112, San Antonio Chart, Texas, by showing the bi-sector for East A quadrant as 263° rather than 353°.

(2) Correct Peterson Fld, Colorado Springs, Colo. Inst. Appch Procedure, by adding

(3) Delete Muroc, Calif. instrument approach procedure. "Not to be used under IFR ufn".

(4) Correct page 14, Bergstron Field, Austin, Tex., procedure chart by showing a 930' obstruction on the NW course 2 miles from the center cone, rather than on the NE course. (Geographical coordinates are 30-20-3 N lat., 97-45-15 W long.)

✓ CORRECTION FOR T.O. 08-15-04 AND PILOT'S HANDBOOK: Correct Instrument Low Approach Procedure (ILS) FOR Barksdale Field, La. as follows: Radio Range to Interception of localizer: Distance: 3 miles; Initial Approach Procedure (From radio range or radio beacon to interception of Localizer): Hold on the Dixie FM, and when cleared for

✓ Indicates new or revised Special Notices

approach fly a heading of 110° (approx. 3 miles) and intercept localizer. Descent to 1200' after leaving Dixie FM. Final Approach Procedure (From Point Where Shift-To-Localizer occurs to Runway Contact): Maintain 1200' altitude on the inbound heading until interception of glide path at outer marker. Missed approach-climb on 143° to 1500', contact tower.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 5 July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the Civil Aeronautics Administration.

In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

V.H.F. CHANNEL ASSIGNMENTS: Following are Navy assignments:

CHANNEL	NAVY FREQUENCY	CHANNEL	NAVY FREQUENCY
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	128.70	9	142.74
5	143.28	GUARD	140.58

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions, or existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction; or merely a burned-out obstruction light or a runway partially unusable because of construction. Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood, or snow, a runway closed because of construction, or the erection of a pole line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public and the data may be checked from an engineering standpoint for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

DIRECTORY OF AIRPORT NOTAMS: Because of space limitations, the airport directory perforce serves as a notam supplement. Notam data revising previous directory issues are indicated by prefixed arrows. The only airport data (other than temporary conditions) carried in the Notices to Airmen section are coordinates (latitude and longitude).

✓ AIR RESCUE SERVICE: Headquarters, Air Rescue Service, Air Transport Command, U.S.A.F., has issued the following memorandum to all civil pilots: "Air Rescue Service is one of the services of the Air Transport Command, U.S. Air Force. Although it is military, its aid is available to you twenty-four hours per day in all parts of the United States. Its equipment is such that once it is alerted, besides conducting a search for you, it can furnish you aid by parachuting doctors to your assistance, if immediate medical aid is needed, and by employing specially equipped ground parties which can traverse any terrain to reach you.

"With your help, this specialized equipment and personnel can more effectively come to your aid. Too often when you are reported missing, valuable time is lost in searching for you and bringing aid to you because Air Rescue Service has no idea of your whereabouts, or there are too many probably areas in which to conduct the search. Thus, you are deprived of expert rescue facilities during the critical period following your misfortune. The simplest way to overcome this biggest disadvantage to you is to file a flight plan with Civil Aeronautics Administration, regardless of the weather along your proposed flight path. If CAA facilities are not available, leave a flight plan with a responsible party at the point of departure. This flight plan should include your name, aircraft type and number, your route, your destination, and when you propose to land there (See part 60, Civil Air Regulations). Two things to remember about a flight plan: Once you file it, follow it! When you land, close it with the nearest CAA Communications Station! If you do these things, there is less chance of your becoming an incident, either "actual" or "false". By failing to close your flight plan, you will become a false incident and may thus deprive someone who really needs assistance from getting it.

In order to become more fully informed about the work of Air Rescue Service and how it can help you in distress, you are invited to visit the nearest Air Rescue Service unit and get acquainted."

CIVIL USAGE OF MILITARY FIELDS: USAF and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

REISSUANCE OF EXPIRED PILOTS CERTIFICATES: 20.550 Reissuance. Any person who on June 30, 1947, held a valid private or commercial certificate and who failed to exchange such certificate in accordance with Section 20.55 of the Civil Air Regulations, may, notwithstanding such failure and without other showing, obtain a pilot certificate with appropriate ratings upon application to the Administrator.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S., unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting aircraft and shall be presented for examination to any inspector of the Administration or state or local law enforcement officer upon the request of such inspector or enforcement officer.

DUPLICATE AIRMAN CERTIFICATE AND RATING RECORD FEE: The fee for duplication of an airman certificate and rating record which has been lost, mutilated or destroyed is now one dollar. All airmen should be guided accordingly when making remittance for duplicates. The notation on the reverse side of the airman certificate and rating record form stipulating a fee other than one dollar for both certificate and rating record is to be disregarded. In future reprints, of the form, the notation will be revised to indicate one dollar for duplication. Duplicate medical certificates are issued only at the discretion of the examining physician. Requests for such duplicate certificates, should, therefore, be made directly to the physician who performed the examination.

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission field offices, or before any CAA flight examiner of the CAA, who has been designated by the FCC to issue the permits, proves he is a U.S. Citizen, that he has need of such authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorization then and there.

FCC offices are listed under U. .S. Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices. There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports.

The "examination", if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months, the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded.

To reduce the number of such complaints, it is requested that the following practices, be put into effect by all fliers:

1. Discontinue all unnecessary low flying.
2. When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas.
3. Re-route channels of approach and departure to avoid residential and business districts whenever possible.
4. If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum.
5. Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

SEAPLANE OPERATIONS: Because of the possibility of local ordinances or restrictions prohibiting seaplane operations in resort or congested areas, the Administrator has issued the following advice to seaplane operators:

"1. Take off as far out from the shore as possible.
2. Cut the takeoff run as short as safety permits.
3. Fly high enough to avoid criticism from residents below, or arrange the flight plan so that you pass over as few houses as possible.
4. Avoid unnecessary 'gunning' or racing of the engine.
5. Explain carefully to those who complain what you are doing to make your airplane a good neighbor.

" In the CAA-Federal-Aid Airport program, we are promoting the use of seaplanes by assisting communities in establishing inexpensive docking and servicing facilities. In view of the high utility value of the seaplane or amphibian, we believe this to be a definite step in the advancement of personal flying in general. Hence, if we are to find acceptance of such facilities, it is up to those pilots who now operate seaplanes to assist us to the utmost by safe and considerate operation of their aircraft."

N.B. The Administrator's admonition was occasioned by numerous complaints received from lake-side residents and vacationists.

1/ SEAPLANE BASE DIRECTORY: A new Seaplane Base Directory, dated December 1, 1947 has just gone to press. It will be available in two weeks to any qualified operator or owner upon request to: Office of Aviation Information, Attention: A-258, C.A.A., Department of Commerce, Washington 25, D. C.

CONTROL TOWER TUNING PRECAUTION: On some aircraft receivers, the channel of 278 kcs is identified as "tower", on the tuning control nameplates. This is not always correct as many towers transmit on frequencies other than 278 kcs. Reports indicate that some confusion is being created by the failure of pilots to tune their receiver to the tower transmitting frequency when such frequency is other than 278 kcs. It is suggested that pilots use care and make certain that they are turned to the transmitting frequency of the tower with which they desire to communicate.

V H F IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the ATC clearances so authorize.

PRIVATE FLIER VHF FREQUENCIES: Practically all CAA Communications Stations and Towers guard the new private flier frequencies of 112.1 mcs for transmission to CAA Communications Stations and 122.5 mcs for transmission to CAA operated towers. The few stations not yet equipped with the new receivers should be fully implemented within the next month.

CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs, in addition to towers' low frequencies.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

F.C.C. DF STATION: Federal Communication Commission monitor station relocated from former location South Miami to Richmond, Florida. This facility is being operated on intermittent basis until further notice.

TWO-WAY RADIO FAILURE PROCEDURES: In the event of failure of two-way radio communications between an aircraft and the ground, the pilot will observe one of the following procedures: (a) If operating under VFR conditions, proceed under VFR and land as soon as practicable, or

(b) Proceed according to the latest air traffic clearance.

If the pilot proceeds according the latest traffic clearance but has not received and acknowledged a clearance to the tower and if other instructions to the contrary are not received, he shall be expected to observe the following and control will be effected accordingly: (1) If the pilot has received and acknowledged a clearance to the destination airport or the radio facility serving that point, he shall continue flight at the altitude(s) last assigned by Air Traffic Control, or the minimum instrument altitude, whichever is the higher, to the radio facility serving the destination airport.

(2) If the pilot has received and acknowledged a clearance to a point other than the destin. airport or the radio facility serving the destination airport, he shall continue flight at the altitude(s) last assigned by Air Traffic Control or the minimum instrument altitude, whichever is the higher, to the radio facility serving the destination airport.

(3) If holding instructions have been received, the pilot shall comply with these instructions until such time as it will be necessary to continue flight so as to arrive at the radio facility serving the destination airport at the expected approach time last received and acknowledged, maintaining the last assigned altitude or the minimum instrument altitude, whichever is the higher.

(4) If holding instructions have been received, but no expected approach time has been received, the pilot shall comply with these instructions until the time Air Traffic Control has specified that further clearance may be expected. He shall then continue, maintaining the last assigned altitude or the minimum instrument altitude, whichever is the higher.

NOTE: The minimum instrument altitude referred to is the minimum established for that portion of the route over which the operation is conducted, regardless of the direction of flight.

Approach: Descent from the altitude maintained to the radio facility serving the destination airport shall be made on the final approach course and shall start at the expected approach time last received. If no expected approach time was received, descent shall be started at the last estimated arrival time specified by the pilot, or as soon as possible thereafter. A full standard instrument approach should be executed unless a VFR approach can be made.

If a clearance to the tower at the airport of intended landing has been received and acknowledged, the pilot shall be expected to comply with any special instructions contained in the clearance and make normal descent for landing.

NOTE: Air Traffic Control may issue appropriate instructions to be broadcast "blind" over air carrier radio facilities (for air carrier aircraft), and over suitable radio range facilities. Instructions must not be broadcast unless Air Traffic Control authorizes such broadcast.

VFR (Formerly CFR) FLIGHT PLANS, AND ARRIVAL REPORTS: VFR flight plans may be filed with any CAA airways communication station or air route traffic control center. VFR flight plans are not transmitted. One hour after E.T.A., if no notice of arrival is received at the station at which the flight plan was filed, queries are sent out over CAA communication systems. If the arrival report is not received within three hours, search and rescue operations are initiated. Inasmuch as the Government may be put to considerable expense in determining the location of aircraft when an arrival report is not filed, it is vitally necessary that all pilots using this service make certain that notice of arrival is filed with the CAA communications station at the termination of the flight.

To reduce radio congestion, pilots should file VFR flight plans, when required, in person or by telephoning the airways communications station or air route traffic control center. CAA control towers have discontinued accepting VFR flight plans for transmission and will not normally transmit arrival reports except upon the specific request of the pilot. Whenever practicable, however, it is desired that arrival reports be filed in the same manner as flight plans. (This corrects Chapter IX, page 114, of the July 1, 1947 Flight Information Manual).

CLEARANCE PROCEDURES FOR IFR FLIGHT: Effective October 8, 1947, and concurrent with effective date of CAR 60 as revised, new clearance procedures for IFR flights are being used in the control of Air Traffic.

1. No Air Traffic Control clearance will be issued for flights operated in accordance with visual flight rules except for flights within a control zone as prescribed in C.A.R. 60.2.

2. Flight plans specifying flight in accordance with VFR for a portion of a flight will be accepted at the point of departure. If VFR flight is proposed for the first portion of the flight, the pilot will be advised to request IFR clearance from the appropriate communications station along the route of flight. The pilot must remain in VFR weather conditions until the clearance is received.

3. When a flight plan indicates IFR flight for the first portion of flight and VFR for the latter portion, the aircraft will be cleared to the point at which VFR flight is planned, inasmuch as no clearance is necessary for VFR flight. The pilot is expected to continue his flight without further contact with Air Traffic Control.

4. Standard separation from other IFR traffic will be provided aircraft on IFR flight plans, except (a) when "at least 500' on top" has been assigned or authorized by ATC in lieu of a cruising altitude if frequent pilot reports indicate a generally unlimited ceiling on top and a forward visibility of at least 3 miles. (b) when VFR operation is specified by ATC during climb to cruising altitude, descent from cruising altitude, or change of altitude enroute. If the flight cannot be conducted under VFR conditions, when such clearance is received, it is the pilot's responsibility to secure an amended clearance before proceeding IFR.

5. Pilots may cancel IFR flight plans at any time by so notifying ATC provided they are operating in VFR weather conditions when they take such action. Where conditions indicate that the remainder of a flight can be conducted in accordance with VFR, a pilot should avail himself of this procedure to lift the restrictions on his own flight and to simplify the general traffic situation. Caution should be exercised, however, that flight plans not be cancelled when IFR conditions are expected in some subsequent portion of a flight. When a flight plan is cancelled and a new instrument clearance is later requested, priority of handling will be based upon the time of filing the new flight plan.

6. When a flight plan is filed indicating altitude change beyond the control area of the center controlling the point of departure, the flight will be cleared to destination with instructions to maintain the altitude at which the aircraft enters the next control area. The pilot should request further altitude changes enroute. Better service can be given the pilot if an altitude change is requested at the time the change is desired.

This procedure cancels and supersedes the Altitude/VFR procedure now contained in the Flight Information Manual.

AIRPORT LIGHT SIGNALS: Effective October 8, 1947, the following special light signals are prescribed by the Administrator for use at airports in accordance with C.A.R. 60.108(e): (1) A white rotating airport beacon lighted during daylight hours, or flashing lights on a tetrahedron during the hours of darkness, shall mean the official ground visibility at the airport is less than three miles, and that if the airport is within an airport control zone, a traffic clearance is required for landing, takeoff or flight in the traffic pattern. (2) A flashing amber light at an airport shall mean clockwise flow of traffic is in effect and that right turns shall be made unless otherwise authorized by Air Traffic Control. These special light signals are in addition to those prescribed in the CAA Flight Information Manual for use with a directed portable traffic signal light, and will be included in the next edition.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTION: Correct New York (Local) Aeronautical Chart, dated September 6, 1947, by changing the frequency from 279 kcs to 379 kcs. on the Floyd Bennett Radio Range, N.Y.

✓ ASSUMPTION OF CONTROL OVER RED CIVIL AIRWAY #57: Effective 0001 EST, December 16, 1947, control was assumed over Red Civil Airway #57 - Detroit-Chicago Air Route Traffic Control Area Boundary established at 70 miles SE of Milwaukee, Wis. (This corrects Airman's Guide, Vol. 2, No. 19)

✓ ON-REQUEST REPORTING POINT: The intersection of the SE course of the Chicago Radio Range Station and the E course of the Joliet Radio Range Station has been designated an "On request" reporting point identified as "Evergreen".

✓ MINIMUM ENROUTE ALTITUDES ADDITIONS AND CORRECTIONS:

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long.	Elevation	Action Taken
Wilmington, N.C. (Bluethenthal Field)	SW			Discontinued
Worcester, Mass. (Airport)	SW			Discontinued
Valdosta, Ga. (Airport)	SW			Discontinued
Humboldt, Nev.	Hourly & 6-hrly			Discontinued
Kokomo, Ind. (Airport)	SW	46-32, 86-04	835	Inaugurated
Lovelock, Nev. (Derby Fld)	Hourly	40-04, 118-33	3900	Inaugurated
Quincy, Ill. (Airport)(new)	SW	39-56, 91-11		Inaugurated
Alamosa, Colo.	Pibal	37-26, 105-51	7543	Begun
Limon, Colo.	SW	39-16, 103-41	5360	Inaugurated

Note: Hourly reports in lieu of SW reports now available from New Bern, N.C. (Simmons-Knott Field), and Alexandria, La. (Airport). SW reports in lieu of 3- and 6-hourly reports now available from Greenville, Maine.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with 2-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off.

(b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See AFF Regulation 100-4, dated March 4, 1944, and C.A.R. Digest or Manual 60).

(c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons, indicate that the ground visibility is less than 3 miles and a traffic clearance is necessary to enter the traffic pattern of airports within the control zone.

FOREIGN SPECIAL NOTICES

INTERNATIONAL NOTAMS: The only source of international notams is the CAA Overseas-Foreign Aeronautical Communications Stations at the following locations: New York, N.Y.; Miami, Fla.; New Orleans, La.; Balboa, Canal Zone; San Francisco, Calif.; Seattle, Wash.; Honolulu, Hawaii, Anchorage, Alaska.

FOREIGN ENTRY PROCEDURES, AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Vol. 2, No. 1, dated July 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

✓ LONDON, ENGLAND: Pilots entering or operating within this area should be familiar with all notams available at the New York International Notam Office.

N.B. The British Government has reported several violations of local air traffic rules. Disciplinary action will be taken on future violations.

AIRPORT AND RADIO NOTICES

LEGEND

•• - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

ALABAMA: ATHENS ARPT: E/W strip soft in wet weather. (10-14)

BIRMINGHAM-RADIO: VHF omni-directional rng without voice operates on test basis, fac unmonitored, and subject to interruptions; not to be used for navigational purposes. Freq. 116.3 mcs, ident. "BH".

BIRMINGHAM ARPT: Closed to civil acft not equipped with operating rcvr. Landing on sod areas approved by twr in dry weather, unsafe in wet weather. Ctn ngts or under IFR. plant S of fld has long taxi and parking strips resembling rnwys. (11-6)

BRIDGEPORT-ALA-TENN-GA ARPT: Ctn when wet. (10-14)

BROOKLEY FLD (MOBILE): Soft-use rnwys, taxi strips only. (10-28)

CENTRE ARPT: NNW/SSE strip closed. N side E/W strip rough. (10-14)

••CLANTON-GRAGG ARPT: 302' obst lgtd twr 5 mi SW (249° true) erected at lat. 32-50-00, long. 86-40-49. (11-25)

CRAIG FLD (SELMA): Bndry lgts inop. Fuel avail. on off. bus. only. (10-27)

FOLEY-OAK ARPT: W end E/W, N end N/S strips soft in wet weather. (10-14)

JASPER-WALKER CO. ARPT: Land inside of bndry mrkrs. Avoid new landing strip now being graded. (10-14)

LIVINGSTON-JACKSON FLD: Rolling and slightly rough. Soft spots along N side at SW end. (10-14)

★MAXWELL FLD (MONTGOMERY)-RADIO: USAF twr no longer grds 3117.5 kcs. (11-10)

FLD: At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)

MOBILE-BATES FLD: N/S rnwy lgts inop. (8-26)

MONROEVILLE-LEGION FLD: Do not confuse golf course fairways with landing strips. (10-14)

★MONTGOMERY-RADIO. Dec. 8, VHF omni-directional rng on 112.1 mcs comm at lat. 32-13-42, long. 86-19-15, for cont. oper. Ident. "TDN". Class: VORW. Fac comm on test basis, unmonitored, unattended and subject to interruptions, not to be used for navigational purposes. Var. 4° E.

TALLADEGA ARPT: N 700' N/S strip soft in wet weather. (10-14)

WINFIELD ARPT: S end N/S strip soft in wet weather. (10-14)

ARIZONA: ••AGENCY PEAK, BCN SITE 3A, PH-EO: Bcn 3 mi SE of Sacatoon decomm. Dec. 17, 1947.

••CHEVROLET HILL BCN SITE, 211 MI, PH-EO: Bcn 5 mi. E of Douglas decomm. Dec. 16, 1947.

ARIZONA DAVIS MONTHAN FLD (TUCSON): E fld closed-acft parked on rnwys. Blinding ceilometer W end fld between ends of NW/SE, E/W rnwys. SAC acft under off. orders will be given full svcg; acft of other commands will be given sufficient fuel for flgt to next fuel stop plus rqrd reserve. Obst lgt inop on 75' pole SE control twr. Former taxi strips 12R and 30L are now open as Rnwys 12R and 30L to be used by lgt acft and rstd to day opers only. (9-24)

GILA BEND AFF: Maj obsts S fld lgtd. (7-21)

LITCHFIELD PARK NAF: No landings permitted later than one-half hr before sunset without prior approval from C.O. No ngt opers. (10-3)

★ LUKE FLD (PHOENIX)-RADIO: USAF grnd/air stn operates on 11,445 kcs CW in addition to freqs previously published. (12-15) FLD: Traffic direction indicator on 2nd hangar from N not operating. (10-15)

MESA-OASIS ARPT: W end E/W, SW end NE/SW strips unsafe for a distance of 500' (ditches across ends). (7-24)

PHOENIX-RADIO: Visual courses of VHF rng not monitored. (8-18) Freq 108.3 mcs, ident "PH".

PHOENIX: Inst training on Phoenix Rng between 5500' and 9500'.

★ PHOENIX-SKY HARBOR ARPT-RADIO: CAA ILS lclzr and glide path flgt-checked and comm Dec 17 serving Rnwy 26. Sys will operate without mrkrs. Not monitored. FLD: Lcl ngt flying acft must be equipped with 2-way rdo. Equip. near Rnwy 12. Installation of ILS in progress off end of Rnwys 26 and 8. (10-3)

TUCSON-RADIO: Rng flgt-checked, courses correctly aligned. (12-16)

WILLCOX-COCHISE COUNTY ARPT: Tetrahedron unreliable. Cattle on fld. (12-8)

WILLIAMS FLD (CHANDLER)-RADIO: USAF rng unreliable and to be used for training only. (12-3) FLD: Use rnwys only. Exten rnwy repairs being conducted. All acft use ctn from 1200M Fri until 0800 M Mon each week. No fuel avail. trans acft. (8-20)

★ WINSLOW-RADIO: Low freq rng stn now grds 3105,4495,6210,3117.5 kcs, 116.1,122.1 mcs. (12-9) Visual-aural rng stn operates unattended or without means of remote monitor. Freq 108.7 mcs, ident. "WO".

★ WINSLOW ARPT-RADIO: CAA ILS lclzr and glide path flgt-checked and comm Dec 19 on an experimental basis, serving Rnwy 28. Approach heading 286°. Sys will operate without middle and outer mrkrs until further notice. Lclzr freq 110.3 mcs, ident "WNW". Lctd 1450' WNW of WNW end of rnwy. Voice feature controlled from INSAC will be comm in near future. Glide path freq 335 mcs. Angle: 2.6°, lctd 900' WNW of ESE end of rnwy 390' right of rnwy centerline. Point of ctc 300' from rnwy end. (12-19) FLD: Acft with rdo ctc Winslow Rdo for lgts. Non-rdo equipped acft circle arpt and flash navigation lgts when rnwy lgts rqrd. Neon approach lgts inop. (9-29)

ARKANSAS BATESVILLE ARPT: N/S strip and E end E/W strip under const-unusable. Taxiway to fuel pump hazardous. (10-17)

FORT SMITH ARPT: W end NW/SE, N end NE/SW rnwys closed. (12-7)

HOT SPRINGS-MEMORIAL ARPT: Ctn in traffic. Inten student training. No twr control. Use rnwys only. (10-23)

LUXORA INT, SITE 39, NO-LS: 30' unlgtd P-line being erected S end N/S rnwy. (9-27)

SEARCY MUN ARPT: Under const. Use with extreme ctn. (10-3)

WALNUT RIDGE AFF: Acft parked all areas fld and ramp. Use rnwys only. Equip. on fld. Closed 1730 to 0800. NE/SW rnwy closed. (10-23)

CALIFORNIA ALAMEDA NAS: Maintain high approach on Rnwys 26L and 21. Hvy acft parked these areas. 175' unlgtd cranes 2000' from NE corner fld-ctn ngts and during low visibility. Equip. adj to and on rnwys. Fld on positive control. (10-3)

** AMBOY BCN SITE, 20A LA-AQ: 4.5 mi NE perm discont. Dec 16, 1947. (Formerly Site 17, LA-AQ was 6 rpm clr and rot. bcn with red course lgts).

ARCATA-REDWOOD FLD: Closed to acft without 2-way rdo. Use surfaced areas only. (10-3)

BAKERSFIELD-KERN CO. ARPT-RADIO: CAA ILS inop temp, will be recomm with voice and ident "BD". Middle mrkr will be decomm soon for installation of compass lctr and will be recomm about Dec 22. (11-19) (Dates of these changes being investigated). FLD: Unlgtd 92' pwr line 1/2 mi N of bndry. (10-30)

BECKWOURTH-PLUMAS CO. ARPT: Use rnwys, taxi strips only-turf rough. (6-2)

BLYTHE AFF: Obst lgts atop control twr inop. (2-28)

BLYTHE-BRESSON ARPK: Soft spot W side N/S strip. (10-3)

BOCA, BCN SITE 17A, SF-SL: Bcn inop. (9-22)

BRAWLEY-O'CONNELL BROTHERS ARPT: N/S strip avail for taxiing only, muddy when wet. (10-3)

** CALIFORNIA BURBANK-LOCKHEED AIR TERMINAL: 255' obst lgtd rdo stn KMGM 6 mi SSW (195° true) erected at lat 34-07-08, long. 118-23-37. Closed to all trans P-80 acft except on special projects for modification that stn. Right traffic Rnwys 7, 15; left traffic Rnwys 25, 33. Approach lgts Rnwy 7 changed to red. 2-way rdo rqrd all acft. Rnwy 13-31 closed (parked acft). No NG facs. (7-9)

CAMARILLO-CAMARILLO-VENTURA CO. ARPT: Use rnwys, shoulders only. Taxiways and bldg area closed. (10-3)

CATALINA ISLAND-CATALINA ARPT: Private. Scheduled airline opers only. Use by acft other than United Air Lines, Inc, absolutely prohibited. (12-3)

CEDARVILLE ARPT: CLOSED to all opers. (9-10)

CHINO-CAL AERO ARPT: Use rnwys only-parked acft. (10-3)

COALINGA ARPT: Left traffic at 500'. (10-23)

COTATI OLF: Crash truck avail. at Santa Rosa NAAS on req. (10-3)

DAGGETT INT, SITE 13, LA-AQ: Areas immediately outside bndry lgts utilized for sto. Remain on rnwys unless in vcnty of bldgs N of intersection Rnwys 3, 7. (10-23)

EL CAJON-GILLESPIE ARPT: Right traffic when landing and taking off to the E. (10-16)

EL CENTRO NAS: Avail. 0700 to 1800. Other hrs on 30 minutes prior notice. Tetrahedron lgtd all times. (10-3)

★ EL TORO MCAS-RADIO: Navy GCA fac operates on VHF commun channels: 3-6-7-8-9. HF communs: 3475,4890,6620 kcs. Emerg communs: 290,3117.5 kcs, 140.58 mcs. (12-17)

EUREKA-HUMBOLDT CO. ARPT: 25' fone wires NW end NW/SE rnwy, 100' back from end of rnwy. Right traffic pattern. (10-3)

FAIRFIELD-SUISUN AFF (FAIRFIELD)-RADIO: USAF ILS inop. (12-12)

FALL RIVER MILLS-SHASTA SKY RANCH ARPT: Approx 1/3 of the main strip has been gravelled and should be used during the winter months. Medium and large acft avoid during the spring thaw. (10-3)

FRESNO-HAMMER FLD: Traffic pattern 800'. Landing direction controlled by tetrahedron. (12-5)

GLENDALE-GRAND CENTRAL ARPT: Effect Jan 1, acft rqrd to have rdo rcvr. (12-9)

HAMILTON FLD (SAN RAFAEL): Extension to Rnwy 12 closed except in emerg. (10-18)

★ INDIO-RADIO: Dec 8, Adtnl VHF voice fac avail. on 111.1 mcs.

JACKSON-AMADOR CO. ARPT: CLOSED (const). (10-29)

LAKEPORT-LAMPSON FLD: NW 800' NW/SE strip rough. (6-15)

LIVERMORE SKY RANCH ARPT: Avail. lgt acft only, except in emerg. (10-3)

LONG BEACH ARPT-RADIO: Soon, CAA ILS will be comm. Lclzr lctd 980' NW of end and extended center line NW/SE rnwy. Freq 110.3 mcs. Voice facs from twr are avail. on the lclzr freq. and cont ident. "HB" will be transmitted with a tone freq of 1020 cps except during voice transmissions. Glide path lctd 800' from SE end and 400' SW of center line of NW/SE rnwy. Outer mrkr keyed 2 dashes per second, lctd 28,645' from SE end of NW/SE rnwy, modulation 400 cps. Middle mrkr keyed alt dots and dashes, lctd 4041' from SE end NW/SE rnwy, modulation 1300 cps. Both mrkrs on extended rnwy center line. Mag approach bear. 302°. Outer mrkr compass lctr will be comm at a later date on 242 kcs, lctd at outer mrkr site. Ident. "H". (11-27) FLD: Approach lgt lane on the SE end of the NW/SE rnwy will be operative soon. All facs will operate cont on a 24 hr basis. (10-24)

★ LOS ALAMITOS NAS (LONG BEACH)-RADIO: Navy twr now in oper on 140.58 mcs in addition to published freqs. (12-10) Navy GCA fac operates on following freqs in addition to those now published: HF communs: Transmits on 3105,3195,3395,6290,6500 kcs. VHF commun channels: 1-3-9. (12-10) FLD: Closed 1630 to 0800 except in emerg or by prior arrangement. Only Rnwy 22L open. Equip. on fld. (9-14)

LOS ANGELES ARPT: Ctn approach to Rnwy 29-two 25' poles at arpt bndry within this approach zone, unmrkd, unlgtd. Parked acft within approach zone to and parallel with S side Rnwy 29. Unlgtd oil derricks on approach to Rnwy 34. E/W paved strip S side fld avail. taxiing only. All landings, take-offs and taxiing rstd to paved areas. Rnwy 4-22 closed. Rnwy 11-29 avail. for day and ngt take-offs and day landings only. Equip. on fld days. (10-30)

LOS ANGELES-LOS ANGELES-LONG BEACH HARBOR EMERGENCY SEAPLANE LANDING AREA: May not be avail. on short notice due to congestion in anchorage area. Two hrs advance notice should be given if possible. (7-1)

LOWER LAKE-HOBERG ARPT: Take off to SSE-land to NNW. (7-11)

** MADERA ARPT: 36" clear and green rot. bcn operating sunset to sunrise is mounted 51' above grnd on the E side of landing area at lat 36-59-30, long. 120-06-45.

MARCH FLD (RIVERSIDE): Rnwy 7-25 closed-avail. on twr permission only. No 100 oct avail. Rnwy 12L-30R closed 0730 to 1630. Inten instrument flying training in AT-6 type

[redacted]:acft days Mon thru Fri. (11-5)
MARTINEZ ARPK: Unusable during rainy weather. (10-3)
MATHER FLD (SACRAMENTO): Use rnwys only-mat unserviceable. (1-29)
McCLELLAN FLD (SACRAMENTO): Rnwy 4-22 closed (parked acft). Equip. and parked acft adj all rnwys and taxiways. Shoulders, unsurfaced areas unsafe. (4-23)
MERCED MUN. ARPT: Daylgt oper of bcn is to warn lcl trans acft of approaching airline acft. Ctn, approach lgts inop. (6-24)
MODESTO ARPT: Installing rng lgts across rnwy ends. Const, soft spots, mrkd. (10-3)
MOFFETT FLD NAS-LTA-HTA (MTN VIEW)-RADIO: Navy rng flgt-checked Dec 8, courses correctly aligned. Soon, Morgan Hill Navy bone-shaped FM will be comm on the SE course at lat 37-10-09, long. 121-41-02, bear. and dist: 290°, 24.8 mi, ident 2 dashes. (12-21)(Date of commissioning being investigated). FLD: Fld on positive control. Multi-engine acft above JRB class use Rnwy 14L-32R only, except in emerg. N connecting taxiway closed to all traffic. (6-17)
MONTEREY PENINSULA ARPT: Right traffic Rnwys 24,28 left Rnwys 6,10. (10-3)
MUROC AFF-RADIO: USAF rng unreliable and should be used for homing and training only. (12-4) FLD: Lctd within a danger area. Closed to all trans acft except on written permission Commanding General, Air Materiel Command. Acft will not carry trans passengers to this fld. (10-31)
NEEDLES ARPT: Equip. on fld days except Sun. Trenches along sides of rnwys near intersection. Acft remain on pavement. Soon, all rnwy and approach lgts "on call". Acft without 2-way rdo should make advance req for rnwy lgts and 36" rot bcn will operate cont from sunset to sunrise exhibiting 12 clear flashes a minute. (12-11)
OAKLAND ARPT-RADIO: Dec 4, CAA ILS outer mrkr will be shut down temp for relctn to new site 4.72 mi from approach end of Rnwy 27-9. (11-17) Soon a middle mrkr fac will be comm 3500' from approach end of Rnwy 27-9. Soon, bndry mrkr will be discont. (Dates of these changes being investigated). FLD: Rock surface area adj to Rnwy 27R avail. small acft. Adhere to instructions issued by twr. Maintenance facs avail. 0800 to 1800. Closed to acft not equipped with 2-way rdo except acft may land for repairs or fuel without rdo on permission from arpt supt. Rnwy 6-24 avail. lgt acft only. Hvy acft use rnwys, taxi strips only. Arpt channel unmrkd day, ngt. Turf areas between all rnwys avail. for emerg use. (10-7)

Excavation 8 x 8' adj N edge Rnwy 13-31 about 2000' NW of SE end, mrkd. Drainage pit about 8 x 8' alongside N side Rnwy 13-31 about 600' SE of intersection of Rnwy 22, mrkd. Lclzr antenna shelter obst lgtd and flood-lgtd. Equip. vcnty of antenna shelter. Equip. on both edges of entire length of Rnwy 31. High intensity lgt on pole No. 9 in approach lgt lane to Rnwy 4-22 operating on exper basis during ceiling conditions of 600' and below, days, ngts. 4 temporary derricks being erected in vcnty of Ft. Hamilton, Brooklyn, to be approx 326' high by Dec. 25, unlgtd. (12-12) See Notice under Newark Arpt., N.J.

NEW YORK INTERNATIONAL ARPT-RADIO: CAA ILS operates for purposes of pilot training and familiarization only. Hrs of oper: 0830 to 1700 Mon thru Fri. Serves Rnwy C (ENE/WSW) with approach from WSW. Mag. heading for landing: 72°. Lclzr freq. 109.5 mcs, ident. "NY". Glide path freq. 332.6 mcs, angle: 2.6°. Outer mrkr lctd 5.8 mi from end Rnwy C, keyed 2 dashes per sec. All acft utilizing this fac must clear with Navy twr at Floyd Bennett Fld. New York International Arpt under const. and minimum alt permitted during simulated approaches will be 200'. (12-10) FLD: Not yet opened-const. Equip. with booms 190' high lctd in various areas on arpt. Ctn advised on any low flying or simulated low approaches. (11-4)

NIAGARA FALLS ARPT: Use rnwys, taxi strips only. Obst lgts lgtd sunset to sunrise. Rnwy lgts avail. sunset to midngt. Flares on rnwys from midngt to sunrise. (11-20)

NORTH TONAWANDA-SHAWNEE FLYING SERVICE: Glide activity, including airplane and two in progress during the summer and autumn months. (6-12)

PENN YAN ARPT: Ctn at N/S and E/W intersection. Soft in wet weather. (11-3)

RICHMONDVILLE-SCHOHARIE CO. ARPT: Right traffic when landing to the E. 800' mtn directly N of fld. (11-3)

ROCHESTER ARPT: Use rnwys only-soft. No hangar space. Equip.on fld days. (11-3)

ROCHESTER-HYLAN FLD: Use strips only-ctn when wet. (11-3)

ROME AFF-RADIO: USAF grnd/air stn freq. 140.58 mcs inop. (12-12) FLD: Traffic alt 1500' MSL. Right traffic pattern Rnwys 6,33., left traffic pattern, Rnwys 10,15,24. Hospital 3/4 mi from Rnwy 28-avoid if possible. Clump of trees 125' to left and 700' from end of Rnwy 24. (4-18)

SALAMANCA ARPT: The City of Salamanca has passed an ordinance that any person violating traffic pattern, Federal and State regulations, is subject to a penalty of $100 for each violation. Closed to hvy acft. Right traffic when taking off and landing into the W. (11-3)

SARANAC LAKE ARPT: Use rnwys, taxi strips only. Turf rough. New E/W rnwy being const. Equip. on fld. (11-3)

SAYVILLE ARPT: Use in emerg only-2' grass, brush on fld. (8-25)

NEW YORK: SILVER CREEK ARPT: CLOSED (const.) (6-12)

SODUS-WALLINGTON ARPT: Wires S end N/S strip, orchard N end. Equip. on fld. Avail. lgt acft only. Ctn when wet. Avail. days only. (11-3)

STEWART FLD (NEWBURGH): No USAF acft will be cleared this fld under IFR. No fuel avail. trans acft except on off. bus-orders rqrd. (9-23)

★SYRACUSE ARPT-RADIO: Effect. Nov 26, approach control procedures effected by the twr. Pilots cleared to approach control may contact Syracuse Approach control on 3105,4495, 6210,3117.5 kcs, 122.5 mcs and receive on 278 kcs. FLD: Soon, approach lgt lane will be comm E end E/W rnwy. (7-3)

SYRACUSE MUN. ARPT: Turf areas soft after heavy rains. (6-13)

TONAWANDA ARPT: NE/SW strip rough. Acft land on either side of rnwy. (2-25)

**UTICA ARPT: Four 300 M/M electric code bcns flash. red operating sunset to sunrise is mounted on top of each of four 264' twrs of a rdo stn 5 mi SSW 195° true at lat. 43-06-16, long. 75-20-19.7. Grading opers in progress over an area extending 700' in length and 300' wide. Area lctd directly in front of apron, mrkd. Pilots ctnd to avoid this area in taxiing to and from hangar. (9-30)

VALLEY STREAM-COLUMBIA AIRFLD: Closed to all Navy acft except in emerg. (11-3)

WAPPINGERS FALLS ARPT: Fld unattended. No svcg facs, fuel, nor maintenance. (11-25)

WATERTOWN-RADIO: Visual-aural rng figt-checked Oct 2. all courses normal except SW visual, which drifts to 230° when outbound heading beyond 14 mi from stn. Course returns to published bearing at Oswego, N.Y., 41 mi from stn-ctn. Range unmonitored, freq. 109.1 mcs, ident. "WB". (11-14)

WHITE PLAINS-WESTCHESTER CO. ARPT-RADIO: ILS facs being operated for tuning purposes and grnd check until about Dec. 30. Lclzr on 109.5 mcs, ident. "WCH". Glide path on 332.6 mcs, middle mrkr keyed alt dots and dashes, outer mrkr keyed two dashes per second. About Dec. 30, the joint use of the middle mrkr compass lctr and control twr transmitter will be discont. A new control twr transmitter will be comm on 260 kcs with the transmitter in the control twr structure lctd approx 800' NE of the NW/SE rnwy at lat. 41-04-02, long. 73-42-19. Concurrently the freq of the middle mrkr compass lctr will be changed from 260 kcs to 281 kcs. Ident. will remain unchanged. Freq. of the outer mrkr compass lctr will be changed from 281 kcs to 356 kcs. Ident. will remain unchanged. (12-19)

WILLIAMSVILLE-SHERIDAN ARPT: E/W rnwy under const-NE/SW avail. with ctn.(2-21)

WINGDALE ARPT: Avail. lgt acft only-rough. (3-21)

NORTH CAROLINA: ASHBORO ARPT: 220' twr rdo stn WGWR being erected 6.5 mi NNE (13° true), temp obst lgtd. (10-1)

★ASHEVILLE-RADIO: Visual-aural rng freq changed to 108.3 mcs on test basis Dec. 12, stn not to be used for navigational purposes pending flight check.

ASHEVILLE-HENDERSONVILLE ARPT: No ctc lgts installed on NW/SE rnwy. Approach all rnwys with ctn. No rdo facs. (9-24)

ASHEVILLE-JOSEPHSON ARPK: Four 181' twrs rdo stn WLOS being erected 0.5 mi NE (35° true), temp lgtd. (6-28)

ATLANTIC MCAAS: Use in emerg only (caretaker status-no facs)(10-13)

BURLINGTON ARPT: N/S strip and all sod areas soft. (12-12)

CHARLOTTE-RADIO: Rng figt-checked, courses correctly alinged. (12-19)

CHARLOTTE-DOUGLAS ARPT: Use paved areas only-soft spots in sod. Lclzr antenna shelter being const 500' from NE end NE/SW rnwy on approx 40:1 glide, mrkd. Instrument landing and approach lgt sys being installed. SW rng twr lctd 1.7 mi S, unlgtd.(12-11)

CHERRY POINT MCAS: Equip. on rnwys. (6-30)

ELIZABETH CITY-RADIO: VHF visual-aural rng figt-checked Dec. 5, courses correctly aligned. VHF aural courses unmonitored. Interference noted on NE course at distances further than 50 mi and above 10,000'. (12-5)

ELIZABETH CITY CGAS: Stay on rnwys-shoulders soft, rough. Closed ngts from 1900 to 0700 except on prior arrangement. Civil acft use only in emerg. or with prior permission of the C.O. Closed to acft exceeding 60,000 lbs gross weight. Rnwy 5-23 closed. Equip. on fld. (6-13)

FORT BRAGG: Hvy firing is being conducted in all sections of Ft. Bragg danger area up to 20,000'. All acft must avoid this area. Inten training days with rdo control target planes from fld 6 mi due E of N end Pope Fld. Acft will operate within circle of 4 mi radius from center of fld with max alt of 2000' taking off by catapult, landing by parachute.

GASTONIA MUN. ARPT: Training program consisting of from 2 to 6 acft in progress ngtly during VFR conditions. All flights conducted below 3000'. (9-23)

[redacted]: GREENSBORO-RADIO: VHF omni-directional rng operating on test basis, unmonitored and not to be used for navigational purposes. Freq. 117.5 mcs, ident. "GW". (11-7)
GREENSBORO-HIGH POINT ARPT: Use rnwys only. Equip. on fld days. (10-14)
★HICKORY-RADIO: Aural courses unmonitored (11-26). Dec. 11, VHF rng freq. changed to 108.7 mcs. Rng operating on test basis only-not to be used for navigational purposes pending flgt check.
MANTEO-ROANOKE ISLAND ARPT: Bcn inop. (9-1)
NEW BERN-RADIO: VHF rng aural courses unmonitored.
POPE FLD (FT. BRAGG): Closed to liaison type acft without 2-way rdo. (8-29) 427' twr Rdo Stn WFNC being erected 9 mi SE (134° true) (9-20)
RALEIGH-RADIO: VHF omni-directional rng placed in cont oper, on test basis, fac unmonitored and subject to interruptions; not to be used for navigational purposes. Ident. "DU". Freq. 117.4 mcs.
RALEIGH-CAP ARPT: S 200' N/S strip unusable. SW 1400' NE/SW strip under const.(10-13)
RALEIGH-DURHAM ARPT: Approach lgt lane operated when conditions of 1000' ceiling or less and/or visibility of three miles or less exists and on req. (8-4). ILS and transmitter bldgs 900' from NE end NE/SW rnwy. Glide path unit 400' S centerline and 900' S of SW end NE/SW rnwy. Approach lgts 75' N of S end NE/SW rnwy and extending 1500' from end of rnwy. All obsts mrkd. Use rnwys, taxi strips only. (7-18)
★ROCKY MOUNT-RADIO: VHF visual-aural rng courses realigned to: Visual: 70°, 250°; aural courses: 160°, 340°. Not to be used for navigational purposes pending flgt check. Subject to interruptions during flgt check about Dec 15. (12-13)
ROCKY MOUNT ARPT: Bcn temp inop. (7-28)
★SALISBURY-RADIO: Coordinates for VHF rng: lat 35-41-45, long. 80-44-27. (12-5) VHF omni-directional rng placed in cont oper on test basis, fac unmonitored, subject to interruption and not to be used for navigational purposes. Freq. 114.3 mcs, ident. "SUY".
SALISBURY ARPT: 235' water twr being erected 3.5 mi SW. (10-31)
SEYMOUR-JOHNSON FLD (GOLDSBORO): Use rnwys only-shoulders soft.
WEEKSVILLE NAF-LTA-RADIO: Voice commun. on 524 kcs on Navy Rng inop. Use Elizabeth City CGAS twr freq. (11-26) FLD: Avail. HTA and LTA acft from 0800 to 1630, all other times by prior arrangement with the C.O. or Opers Office. (7-16)
WILMINGTON-RADIO: VHF rng aural courses unmonitored. (12-1) VHF visual-aural rng courses flgt-checked Dec. 6, courses correctly aligned.
★WILMINGTON-NEW HANOVER ARPT-RADIO: Teletype disignator: "DIL". (12-6)
WINSTON-SALEM-SMITH REYNOLDS ARPT: N/S, NW/SE rnwy lgts dim, partly unlgtd SE end. (12-9)
[redacted]: ASHLEY ARPT: 125' unlgtd twr 1 mi NW of W end E/W rnwy. (11-7)
★BISMARCK ARPT-RADIO: CAA ILS glide path comm Dec 9, freq 335 mcs. Angle 2°.
